#### George Mason University College of Education and Human Development Secondary Education Program

Promoting Learning Development Across the Lifespan

#### EDUC 672:002 Human Development and Learning: Secondary Education Spring Semester, 2014

| Instructor:     | Erin E. Peters-Burton, PhD, NBCT            |
|-----------------|---|
| Date and Time:  | <b>January 21 – May 5</b> (T 7:20-10:00 pm) |
| Class Location: | West Hall 1001                              |
| Telephone:      | 703-993-9695                                |
| E-mail:         | epeters1@gmu.edu                            |
| Office:         | Thompson 1404                               |
| Office Hours:   | By appointment                              |

#### **Required Textbooks**

Snowman, J., & McCown, R. (2013). *Educational psychology*. Wadsworth, Cengage Publishing. (This is an interactive part-print, part e-book that includes video cases and autograded quizzes among other online supports.)

The main textbook also comes with online video cases with guiding questions that will be assigned in addition to the reading. The purpose of the video cases is to give you more experience with adolescents in a classroom setting. If you buy a used book, you will not have to buy the supplemental online component. I will accommodate the use of this part of the book in class. Of course, if you want to have access to it, feel free to buy a new book or a used book with the supplemental site.

Other articles/handouts will be distributed in class or posted on-line at the course website. (Your GMU email address is required for communication with the course instructor and for using

Blackboard! The site for our course is at <u>http://mymasonportal.gmu.edu</u>. Use your GMU email login and password to access the site.)

#### **Optional Textbook**

Publication Manual of the American Psychological Association (6<sup>th</sup> ed.).

#### **Course Description**

Education 672 explores the processes that influence the intellectual, social, emotional, and physical development of middle and high school students. Within that context, the course further examines the processes and theories that provide a basis for understanding the learning process. Particular attention is given to constructivist theories and practices of learning, the role of symbolic competence as a mediator of learning, understanding, and knowing, and the facilitation of critical thinking and problem solving. Processes of developing and learning are considered as they impact the design of instruction and the selection of curriculum. The course also explores the relation of theories of learning to the construction of learning environments, student motivation, classroom management, assessment, and how technology supports teaching and learning.

#### **Course Methodology**

The course is structured around readings, case analyses, reflections on those readings, conceptual analyses of developmental psychology and learning theories, expert group projects, a review of current research, and technology activities. EDUC 672 seeks to build clear bridges between theoretical/research perspectives and classroom practice. Student participation and involvement are crucial for making the course successful for everyone.

You can visualize the course as having three parts:

- 1. DEVELOPMENT AND DIVERSITY
- 2. LEARNING AND MOTIVATION
- 3. CLASSROOM STRATEGIES

All of the sections will help you understand psychological research and apply it in your classrooms.

| Relationship Between Course Objectives and CEHD Core values   |  |  |  |
|---|--|--|--|
| Course Objectives   | Conceptual Framework Core<br>Values  |  |  |
| Students will demonstrate an understanding of stages and<br>processes relating to adolescents' social, emotional, moral,<br>cognitive, and physical development by writing a five-page<br>paper on adolescent behavior.   | Research-based practice<br>Ethical leadership<br>Social justice                                |  |  |
| Students will develop an understanding of how individuals<br>differ in their approaches to learning and how to create<br>instructional opportunities that are adapted to learners from<br>diverse cultural backgrounds and with exceptionalities by<br>attending in-class lectures given by experts in these fields<br>and by working on individual case studies. | Research-based practice<br>Ethical leadership<br>Social justice                                |  |  |
| Students will demonstrate an understanding of how<br>theoretical approaches to learning and development relate<br>to classroom management, instruction, and assessment by<br>creating a case study of an adolescent learner, developing<br>learning objectives and planning teaching and assessment<br>strategies.  | Research-based practice<br>Ethical leadership<br>Social justice<br>Innovation                  |  |  |
| Students will identify theoretical/research frameworks<br>associated with student motivation and with creating<br>learning environments that promote adaptive forms of<br>motivation by writing a ten page paper on adolescents and<br>motivation.  | Research-based practice<br>Ethical leadership<br>Social justice<br>Innovation                  |  |  |
| Students will develop and reinforce their critical thinking,<br>problem solving, oral, and writing skills by participating in<br>a collaborative group that researches and presents various<br>aspects of psychological theory and research using<br>PowerPoint slides.   | Research-based practice<br>Ethical leadership<br>Social justice<br>Innovation<br>Collaboration |  |  |
| Students will demonstrate an understanding of the role in<br>the learning process of constructing knowledge, prior<br>knowledge, problem solving, and social/environmental<br>scaffolding through successfully completing an analysis of<br>a case study.   | Research-based practice<br>Ethical leadership<br>Social justice<br>Innovation                  |  |  |

# **Relationship Between Course Objectives and CEHD Core Values**

#### **Course Requirements**

**1. Fieldwork Assignments:** Students will complete three writing assignments about teenagers, psychology, and teaching. The assignments will deal with 1) adolescent levels of development (e.g., physical, social, emotional, moral/ethical, and intellectual), 2) case study for teacher problem solving, and 3) adolescent motivation.

**2. Presentation of Psychological Theory (Theory to Practice Presentations):** Students will choose groups of two to four people. Each small group will be asked to analyze readings and research in a specific psychological area, and present it to the class. All research must draw upon social scientific work on adolescent development, citing a minimum of five scholarly references each. The oral presentation includes both a discussion of the theory and an interactive activity for the class that illustrates the theory, will last approximately 20-40 minutes. References for the presentation should be included on the last slide of the power point.

**3. Application Project:** Students will create a case study of a typical adolescent that may be encountered in a general education classroom. Students will describe the physical, social/emotional and cognitive/language development of the adolescent. Strategies for determining adolescent motivation, prior knowledge and values and goals of the adolescent will be described. Strategies for meeting the needs of the case study adolescent within a classroom will be described. Authentic assessment strategies that measure transfer of classroom learning to the adolescent's out-of-school learning will be described.

**4. Classroom Participation and Attendance Policy:** Due to the importance of classroom presentations and classroom discussion (including case studies) to your total learning experience, I encourage you to both attend and participate in class regularly. Readings and video cases must be completed <u>before class</u>. Attendance, punctuality, preparation, and active contribution to small and large group efforts are essential. These elements of your behavior will reflect the professional attitude implied in the course goals and will account for 10% of your course grade. (Please see the rubric in the grading section of this syllabus.) If you must miss a class, notify the instructor (preferably in advance), and you are still responsible for completing all assignments and readings for the next class. You are responsible for getting assignments in on time and catching up if you are absent. [Anyone missing more than two classes should see the instructor to discuss dropping the class.]

#### Written Assignments

All written assignments must be completed electronically and sent by email to epeters1@gmu.edu. Assignments are to be turned in at the beginning of class on the date due. Late assignments will not be accepted without making prior arrangements with the instructor. In addition, all work submitted in this course must be your own or attributed to the proper author using the appropriate research reference format (APA). Refer to the GMU Honor Code for further information.

#### **Out-of-Class Sessions**

One or more of our class sessions may be held out-of-class (online). This class (or classes) is to be considered a regular instructional time, and the assignments given are the equivalent of a full, in-class session. The out-of-class hours include research, use of professional websites, online discussions, readings, analyses of case studies, writing the research project, preparing the PowerPoint presentation, and other assignments. Formal online discussions will take place at http://mymasonportal.gmu.edu.

The Graduate School of Education (GSE) expects that all students abide by the following: **A. Dispositions** 

Students are expected to exhibit professional behavior and dispositions. See gse.gmu.edu for a listing of these dispositions. The Virginia Department of Education and the National Council for Accreditation of Teacher Education promote standards of professional competence and dispositions. Dispositions are values, commitments, and professional ethics that influence behaviors toward students, families, colleagues, and all members of the learning community. The Graduate School of Education expects students, faculty, and staff to exhibit professional dispositions through a:

Commitment to the profession

Promoting exemplary practice Excellence in teaching and learning Advancing the profession Engagement in partnerships Commitment to honoring professional ethical standards Fairness Honesty Integrity Trustworthiness Confidentiality Respect for colleagues and students *Commitment to key elements of professional practice* Belief that all individuals have the potential for growth and learning Persistence in helping individuals succeed High standards Safe and supportive learning environments Systematic planning Intrinsic motivation Reciprocal, active learning Continuous, integrated assessment Critical thinking Thoughtful, responsive listening Active, supportive interactions Technology-supported learning

**Research-based practice** Respect for diverse talents, abilities, and perspectives Authentic and relevant learning *Commitment to being a member of a learning community* Professional dialogue Self-improvement Collective improvement Reflective practice Responsibility Flexibility Collaboration Continuous, lifelong learning Commitment to democratic values and social justice Understanding systemic issues that prevent full participation Awareness of practices that sustain unequal treatment or unequal voice Advocate for practices that promote equity and access Respects the opinion and dignity of others Sensitive to community and cultural norms Appreciates and integrates multiple perspectives

# COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT STATEMENT OF EXPECTATIONS:

All students must abide by the following:

• Students are expected to exhibit professional behavior and dispositions. See http://gse.gmu.edu/facultystaffres/profdisp.htm for a listing of these dispositions.

• Students must follow the guidelines of the University Honor Code. See <a href="http://oai.gmu.edu/honor-code/<http://oai.gmu.edu/honor-code">http://oai.gmu.edu/honor-code</a>> and <a href="http://universitypolicy.gmu.edu/policies/responsible-use-of">http://oai.gmu.edu/honor-code</a>> and <a href="http://universitypolicy.gmu.edu/policies/responsible-use-of">http://universitypolicy.gmu.edu/policies/responsible-use-of</a> computing/<a href="http://universitypolicy.gmu.edu/1301gen.html">http://universitypolicy.gmu.edu/1301gen.html</a> for the full honor code.

Please note that:

Plagiarism encompasses the following:

- Presenting as one's own the words, the work, or the opinions of someone else without proper acknowledgment.
- Borrowing the sequence of ideas, the arrangement of material, or the pattern of thought of someone else without proper acknowledgment."
  - o (from Mason Honor Code online at http://<u>oai.gmu.edu/honor-code/</u>)
- Paraphrasing involves taking someone else's ideas and putting them in your own words. When you paraphrase, you need to cite the source.
- When material is copied word for word from a source, it is a direct quotation. You must use quotation marks (or block indent the text) and cite the source.
- Electronic tools (e.g., SafeAssign) may be used to detect plagiarism if necessary.

• Plagiarism and other forms of academic misconduct are treated seriously and may result in disciplinary actions.

• Students with disabilities who seek accommodations in a course must be registered with the GMU Office of Disability Services (ODS) and inform the instructor, in writing, at the beginning of the semester. See http://www2.gmu.edu/dpt/unilife/ods/ or call 703-993-2474 to access the ODS.

### Assignments

**1.** Fieldwork Assignment #1 – Analysis of Educational Theory seen in Teen-Based Movie For your first fieldwork assignment, you should read the material published by the National Middle School Association (This We Believe, and Young Adolescents' Developmental Characteristics). Then, watch a movie about adolescents. You may choose any one of these "teenage flicks": The Breakfast Club, Stand and Deliver, Dead Poet's Society, Sixteen Candles, Clueless, Dangerous Minds, To Sir, with Love, Mr. Holland's Opus, 10 Things I Hate about You, Coach Carter, Finding Forrester, or Napoleon Dynamite. Feel free to explore and find a movie that might be relevant. If you do, please approve the movie with the instructor before you use it to complete this assignment. After watching the film, please analyze the adolescent behavior, cliques, characteristics, and interactions in a five-page (double-spaced) paper. Start to apply psychological developmental theory by looking for the five characteristics of adolescents that were mentioned in the Middle School article; however, as you do so, also be aware of Hollywood stereotypes. Please apply a minimum of five psychological concepts that have been discussed in class or that you have read in your textbook. In your paper briefly describe the concept and then explain how the activity in the movie illustrates the theory. Use direct and indirect quotations from the movie. (5 Points)

#### 2. Fieldwork Assignment #2 – Independent Analysis of Case Study

Students will read and complete many case study assignments. These assignments will deal with adolescent levels of development (e.g.—physical, social, or moral), adolescent motivation, and classroom strategies. The case analysis, in general, serves as a means for you to demonstrate your understanding of the intersection of learning theory with pedagogical issues. Cases also allow you to examine multiple perspectives on problems students experience in their schooling. You should use these discussions as practice for this assignment, as Fieldwork Assignment #2 is a summative assessment of your ability to use psychological theory to analyze problems in a classroom.

Case studies give you a chance to practice approaches a thoughtful, ethically principled teacher would use to solve problems. In these case analyses, for example, we always hold the teacher responsible for students' success. If students are not doing well, it is the teacher's task to figure out the mismatch between the teaching and learning that may be preventing the student(s) from being successful. This way of thinking will become second nature, so that when faced with problems in your own class, you will think: "What might I do differently to help this student be successful?"

For the graded case study (Fieldwork Assignment #2), please read the rubric carefully before writing your analysis. It is expected that this paper will be a **minimum of eight (double-spaced) pages**. First, please give **four examples of problems** that occurred in the case study and explain why the event is a problem. Then, **correctly apply at least eight developmental stages, learning theories, or classroom strategies** —with definitions—from your text or other readings. Applying the stages, theories or strategies from educational psychology means to use the theory learned in class to change the teacher's practice in the case study to create a more positive environment. If you do the math for this assignment, it is encouraged that you suggest 2 strategies for each problem that you identify. To pass this course, the paper on the case study must demonstrate mastery at the level of 80% or higher— a "B" grade. (15 points)

#### 3. Fieldwork Assignment #3 – Motivation

For your second fieldwork assignment, you will interview an adolescent about how motivation affects her or his learning and behavior. That is, what motivates this student to succeed? (You may also interview a teacher about what motivational techniques work best in the classroom.) Be sure to read Chapter 11, which has some theoretical underpinnings about motivation, before you do your interview. More than one individual may be interviewed if you want to tie the stories together in a unique way.

You should begin your paper with a general definition of motivation. Do your interviewee's experiences correspond with the formal definition? Also, take into consideration that there are two types of motivation: intrinsic and extrinsic. Be sure to look at attribution theory and relate it to your interviewer's responses. This paper should be **eight to ten pages long** (**double-spaced**). Please **apply a minimum of ten psychological concepts** in your writing. Since it is an interview, feel free to use quotations from your participant(s), but keep the identity of the participants anonymous by using a pseudonym. Once again, use direct and indirect quotations from the interview. (10 Points)

#### 4. Theory to Practice Presentation

You will begin by forming groups of two to four based on a shared interest in a psychological theory used in education. Each group of 2-4 students will choose a psychological topic from the list that follows this description. See the instructor if you would like to propose a topic different from the ones on the list. To start the research process, each group should read the relevant chapter(s) in the textbook and locate a minimum of five research articles each that are published in scientific journals--e.g., *The Journal of Educational Psychology, Contemporary Journal of Educational Psychology, Educational Psychologist, Educational Researcher*, and *Instructional Science*. Books and other sources may also be used. EACH person in the group should identify and report on five research articles. The group should incorporate a short (10-20 min) interactive activity that requires class participation and illustrates the theory being presented. In addition, there will be a group meeting with the instructor to discuss the PowerPoint presentation.

Each group will present its research findings and the activity during a 20-40 minute time period (10 minutes per person). All group members are required to participate in this presentation. Be creative but keep in mind that it is a formal presentation. A rubric will be

used to grade the presentation found at the end of this syllabus.

The purpose of the presentation is to delve deeper into a topic. Search for the latest research on a particular topic, or form opinions about various aspects of adolescent development or educational psychology theory and effectively defend your opinions.

#### **Small Group Topics**

Cognitive/Individual Constructivism and Developmental Stages (Jean Piaget) Social Constructivism (Lev Vygotsky) Information Processing Moral Development (Lawrence Kohlberg) or character development Adolescent Gender Norms(Carol Gilligan) Learner Differences in Adolescent Achievement (this could focus on culture or on cognition) Special Education Needs Psychosocial Development (Erik Erickson) Social Cognitive Theory/Self-Efficacy (Albert Bandura) Humanistic Psychology (Abraham Maslow) Behaviorist Theory (B.F. Skinner) Attribution Theory (Bernard Weiner) Concept Formation (Jerome Bruner) Transfer (David Perkins) Assessment Classroom Management Self-regulated Learning (Zimmerman)

#### 5. Application Project (Performance Based Assessment)

Students will create a case study of a typical adolescent that may be encountered in a general education classroom. Students will describe the physical, social/emotional and cognitive/language development of the adolescent. Strategies for determining adolescent motivation, prior knowledge and values and goals of the adolescent will be described. Strategies for meeting the needs of the case study adolescent within a classroom will be described. Authentic assessment strategies that measure transfer of classroom learning to the adolescent's out-of-school learning will be described. All strategies will be supported by at least two research references (six references total). The length of this double-spaced paper is flexible, but a typical paper will be at least 6 pages, not including references. (30 points)

Every student registered for any Secondary Education course with a required performancebased assessment is required to submit this assessment, Application Project to TaskStream. Evaluation of your performance-based assessment will also be provided using TaskStream. Failure to submit the assessment to TaskStream will result in a the course instructor reporting the course grade as Incomplete (IN). Unless this grade is changed upon completion of the required TaskStream submission, the IN will convert to an F nine weeks into the following semester.

# **Grading Scale**

A = 93-100% A = 90-92% B + = 88-89% B = 80-87% C = 70-79%F = Below 70%
