EDCI 552 (004) - Mathematics Methods for the Elementary Classroom  
3 Credits, Fall 2016  
Fridays 9:00-11:40 Virginia Run Elementary School, Room 224

Faculty
Name: Dr. Courtney Baker  
Office hours: By Appointment  
Office location: 2405 Thompson Hall  
Office phone: 703-993-5081 Cell Phone: 703-615-1314  
Email address: cbaker@gmu.edu

Prerequisites/Corequisites

Admission to the elementary education licensure program.

University Catalog Course Description

Introduces methods for teaching all children topics in arithmetic, geometry, algebra, probability, and statistics in elementary grades. Focuses on using manipulatives and technologies to explore mathematics and solve problems.

Course Overview

In this course we will begin an inquiry into mathematics teaching and learning that will guide you in your first teaching job and give you the tools that will enable you to continue to inquire and learn as part of your work as a teacher. Class sessions will be interactive and will include a variety of hands-on experiences with concrete and virtual manipulatives appropriate for elementary school mathematics. We will explore the teaching of mathematics, investigating both what to teach and how to teach it. We will explore what it means to do mathematics and what it means to understand mathematics through individual, small group, and large group mathematical problem solving. We will investigate ways to represent understandings of mathematical concepts, communicate reasoning about mathematical ideas, and construct mathematical arguments. We will investigate and read about ways children might represent mathematical concepts, looking at ways to help children build connections and see relationships among mathematical ideas. We will explore characteristics of a classroom environment conducive to mathematical learning by reading and discussing the importance of mathematical tasks, mathematical tools, the roles of teachers and students, and the assessment of mathematical understanding.
Course Delivery Method

This course will be delivered using a lecture format.

This course includes multiple instructional strategies and formats including face to face and asynchronous online meetings. Individual session formats vary and may include lecture, small group/large group discussion, hands-on, interactive work, student presentations, and cooperative learning. Practical applications of theory are explored in group activities.

Learner Outcomes or Objectives

This course is designed to enable students to do the following:

A. Know what constitute the essential topics in mathematics of the modern early and intermediate grades school program.
B. Identify and use selected manipulatives and technology such as linking cubes, attribute blocks, geoboards, base-10 blocks, fraction circles, tangrams, calculators, and computers to teach appropriate mathematics content topics in the early and middle grades.
C. Identify and use various instructional strategies and techniques (cooperative and peer group learning, activity centers, laboratories and workshops, teacher-directed presentations, etc.) to teach mathematical content topics appropriate for the early and intermediate grades to all children, including those from non-mainstreamed populations.
D. Identify and use alternative methods for assessing students’ work in mathematics in the early and intermediate grades.
E. Solve problems in the mathematical content areas of logic, number theory, geometry, algebra, probability, and statistics appropriate for adaptation to the early and intermediate grades.
F. Know and explain the learning progression in relation to the standards-based mathematics curriculum, the key elements of the National Council of Teachers of Mathematics Principles and Standards for School Mathematics, and the key elements of the Virginia Standards of Learning for Mathematics.

Additionally, this course supports the CEHD Core Values of collaboration, ethical leadership, research-based practice, social justice, and innovation. Statements of these goals are at http://cehd.gmu.edu/values/.

Professional Standards (Interstate Teacher Assessment and Support Consortium (InTASC) & Association for Childhood Education International Elementary Education Standards (ACEI):)
Upon completion of this course, students will have met the following professional standards:

<table>
<thead>
<tr>
<th>Course Student Outcomes (above)</th>
<th>INTASC Standard (2011)</th>

**INTASC Standard (2011)**

Standard #4: Content Knowledge
The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make these aspects of the discipline accessible and meaningful for learners to assure mastery of the content.

Standard #7: Planning for Instruction
The teacher plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

Standard #8: Instructional Strategies
The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

Standard #6: Assessment
The teacher understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.

Standard #5: Application of Content
The teacher understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

Standard #1: Learner Development.
The teacher understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Standard #2: Learning Differences
The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
Association for Childhood Education International Elementary Education Standards 2007

1.0 Development, Learning, and Motivation—Candidates know, understand, and use the major concepts, principles, theories, and research related to development of children and young adolescents to construct learning opportunities that support individual students' development, acquisition of knowledge, and motivation.

2.3 Mathematics—Candidates know, understand, and use the major concepts and procedures that define number and operations, algebra, geometry, measurement, and data analysis and probability. In doing so they consistently engage problem solving, reasoning and proof, communication, connections, and representation;

3.1 Integrating and applying knowledge for instruction—Candidates plan and implement instruction based on knowledge of students, learning theory, connections across the curriculum, curricular goals, and community;

3.5 Communication to foster collaboration—Candidates use their knowledge and understanding of effective verbal, nonverbal, and media communication techniques to foster active inquiry, collaboration, and supportive interaction in the elementary classroom.

4.0 Assessment for instruction—Candidates know, understand, and use formal and informal assessment strategies to plan, evaluate and strengthen instruction that will promote continuous intellectual, social, emotional, and physical development of each elementary student.

Required Texts

Course Performance Evaluation

Students are expected to submit all assignments on time in the manner outlined by the instructor (e.g., Blackboard, Tk20, hard copy).

- Assignments and Examinations

  Participation & Professional Dispositions (10%)

Addresses Learner Outcomes: A, B, C, D, E, F

Rich, meaningful, problems will be assigned for each class session. Students are expected to complete these problems during class and incorporate their thinking about strategies used to solve the problems in class discussions. Work on problem sets will be shared in class and on occasion may be collected and evaluated. Students are expected to analyze and reflect on
solution strategies, provide differentiated approaches to center activities, and actively participate in class discussions by applying field experiences and class readings. Professional dispositions are to be displayed at all times while interacting with the instructor and other students. Cell phones are not to be used during class. Laptops are to be used for instructional purposes only.

**Selecting & Sequencing Assignment (10%)**

*Addresses Learner Outcomes: A, C, D, E, F*

Determining how to share student work in class discussions is essential. This assignment will allow you to demonstrate your knowledge in determining which student work highlights the mathematical objective of a lesson. Students will be provided with a short passage centered on a teacher and the mathematical objective for that day, in addition to work samples. Students are expected to identify 2-3 work samples and explain the selection and sequencing of how they would lead a class discussion. A practice assignment will be completed on Week 2.

**Student Assessment Interview: Course Performance Based Assessment (30%)**

*Addresses Learner Outcomes: A, B, C, D, F*

In order to plan effective instruction, you will need to know how to assess children’s knowledge of mathematical concepts. One way to assess children’s thinking is a diagnostic assessment. This assignment has two parts: (1) Design a plan for the assessment, assessing a specific mathematics topic using concrete, pictorial and abstract representations, (2) Conduct the assessment with a child and write a report describing the outcome of the assessment. Based upon feedback from the instructor on your plan, you may make modifications to the final plan and report. The PBA will be turned in via Tk20 on Blackboard, under Assessments.

**Problem-based Lesson Plans & Written Summaries (30%)**

*Addresses Learner Outcomes: A, B, C, D, E, F*

You are required to plan, teach, and complete a formal summary for each mathematics lesson. Each lesson will place an emphasis on five practices that promote productive discussions: Anticipating, Monitoring, Selecting, Sequencing, and Connecting. Each lesson should be written in the Modified GMU Elementary Lesson Plan Format and follow the guidelines set forth by the grading rubric posted on Blackboard. Documents that should be included are: the lesson plan, reflection, anticipated student responses and student work samples.

- **Group Problem-Based Lesson Plan (15%)**: The first lesson will be taught by a small group and presented to your classmates. Each group is expected to: 1) design a Power Point slide and e-mail it to your instructor the Wednesday before class; 2) anticipate possible student responses by solving the
problem using all three representations (concrete, pictorial, abstract); and 3) bring 10 copies of the anticipated student responses to class on the day of the presentation. The group will complete one written reflection on this experience. See rubric/Blackboard for more detail.

- **Individual Problem-Based Lesson Plan (15%)**: After teaching the Group Problem-Based lesson to their peers (in class), each individual will modify and teach this same problem to elementary students in a whole class setting. Each individual will complete a written reflection on this experience. See rubric/Blackboard for more detail.

**Mathematics Curriculum and Assessment Analysis:**

**Illuminations/VDOE Lesson (20%)**

*Addresses Learner Outcomes: C, D, E*

The Mathematics Curriculum and Assessment Analysis will consist of teaching a lesson and using Edthena as a tool for reflection. Students will pick a lesson from the NCTM online resource Illuminations or the VDOE website that they will implement in a whole class setting of elementary students. Details for this assignment are on Blackboard. **This lesson should be video taped.** Students will analyze their videos using the Mathematical Quality of Instruction (MQI) framework. The MQI instrument examines the relationship between the teacher, students and mathematics content using five elements: richness of the mathematics; errors and imprecision; working with students and mathematics; student participation in meaning-making and reasoning; and connections between classroom work and mathematics. Students will need to register for a free MQI account: [http://isites.harvard.edu/icb/icb.do?keyword=mqi_training](http://isites.harvard.edu/icb/icb.do?keyword=mqi_training)

**Other Requirements:**

- **Attendance**: It is your responsibility to attend all class sessions. You are held accountable for all information from each class session whether you are present or not. Reasons for any absence must be reported to the instructor in writing.

- **Tardiness**: It is your responsibility to be on time for each class session. Reasons for any absence must be reported to the instructor in writing.

*Note: I reserve the right to add, alter, or omit any assignment as necessary during the course of the semester. You will always receive advanced notice of any modifications.*
• **Course Performance Evaluation Weighting**
  The assignments across the semester are intended to further your understandings of what it means to teach, learn, and assess mathematics in light of current reforms in mathematics education. All assignments are to be turned in to your instructor on time. **Late work will not be accepted for full credit.** If the student makes prior arrangements with the instructor, assignments turned in late will receive a 10% deduction from the grade per late day or any fraction thereof (including weekends and holidays).

  Participation and Professional Dispositions (10%)
  Selecting and Sequencing Assignment (10%)
  Individual Student Assessment (30%)
  Problem-Based Lesson Plan Summaries (30%)
  Mathematics Content & Pedagogy Assessments (20%)

• **Grading Policies**
  The mathematics education courses in GSE’s Elementary Education Program integrate pedagogy and mathematics content appropriate for the elementary school grades. For students to earn a grade of A in the course, they must demonstrate excellence in both the pedagogical knowledge and the content knowledge of the mathematics appropriate at their level of teaching. Thus, the grading in the course is structured to help evaluate fairly student excellence in both areas. Problem sets and assessment work focuses primarily on ascertaining student excellence in handling mathematics content appropriate for the elementary grades, and represents 50% of students’ grades. Pedagogical knowledge is ascertained primarily from readings, assignments and participation in the course, and represents 50% of students’ grades. Therefore students who demonstrate excellence in both pedagogical knowledge and content knowledge receive grades of A.

  At George Mason University course work is measured in terms of quantity and quality. A credit normally represents one hour per week of lecture or recitation or not fewer than two hours per week of laboratory work throughout a semester. The number of credits is a measure of quantity. The grade is a measure of quality. The university-wide system for grading graduate courses is as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>GRADING</th>
<th>Grade Points</th>
<th>Interpretation</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>94-100</td>
<td>4.00</td>
<td>Represents mastery of the subject through effort beyond basic requirements.</td>
</tr>
<tr>
<td>A-</td>
<td>90-93</td>
<td>3.67</td>
<td></td>
</tr>
<tr>
<td>B+</td>
<td>85-89</td>
<td>3.33</td>
<td>Reflects an understanding of and the ability to apply theories and principles at a basic level</td>
</tr>
<tr>
<td>B</td>
<td>80-84</td>
<td>3.00</td>
<td></td>
</tr>
<tr>
<td>C*</td>
<td>70-79</td>
<td>2.00</td>
<td>Denotes an unacceptable level of understanding and application of the basic elements of the course</td>
</tr>
<tr>
<td>F*</td>
<td>&lt;69</td>
<td>0.00</td>
<td></td>
</tr>
</tbody>
</table>
Note: “C” is not satisfactory for a licensure course. 
“F” does not meet requirements of the Graduate School of Education

TK20/Performance-Based Assessment(s) Submission Requirement
Every student registered for any Elementary Education course with a required TK20 performance-based assessment (designated as such in the syllabus) must submit this/these assessment(s) (EDCI 552: Student Assessment Interview) to Tk20 through ‘Assessments’ in Blackboard. Failure to submit the assessment(s) to Tk20 (through Blackboard) will result in the course instructor reporting the course grade as Incomplete (IN). Unless this grade is changed upon completion of the required Tk20 submission, the IN will convert to an F nine weeks into the following semester.

Professional Dispositions
Students are expected to exhibit professional behaviors and dispositions at all times. (See Elementary Education Program Handbook).

Core Values Commitment
The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: http://cehd.gmu.edu/values/.
GMU Policies and Resources for Students

Policies

- Students must adhere to the guidelines of the Mason Honor Code (see http://oai.gmu.edu/the-mason-honor-code/).
- Students must follow the university policy for Responsible Use of Computing (see http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see http://ods.gmu.edu/).
- Students must follow the university policy stating that all sound emitting devices shall be silenced during class unless otherwise authorized by the instructor.

Campus Resources

- Support for submission of assignments to Tk20 should be directed to tk20help@gmu.edu or https://cehd.gmu.edu/api/tk20. Questions or concerns regarding use of Blackboard should be directed to http://coursessupport.gmu.edu/.
- The George Mason University Writing Center staff provides a variety of resources and services (e.g., tutoring, workshops, writing guides, handbooks) intended to support students as they work to construct and share knowledge through writing (see http://writingcenter.gmu.edu/).
- The George Mason University Counseling and Psychological Services (CAPS) staff consists of professional counseling and clinical psychologists, social workers, and counselors who offer a wide range of services (e.g., individual and group counseling, workshops and outreach programs) to enhance students’ personal experience and academic performance (see http://caps.gmu.edu/).
- The George Mason University Office of Student Support staff helps students negotiate life situations by connecting them with appropriate campus and off-campus resources. Students in need of these services may contact the office by phone (703-993-5376). Concerned students, faculty and staff may also make a referral to express concern for the safety or well-being of a Mason student or the community by going to http://studentsupport.gmu.edu/, and the OSS staff will follow up with the student.
For additional information on the College of Education and Human Development, please visit our website [https://cehd.gmu.edu/](https://cehd.gmu.edu/).

Note: Faculty reserves the right to alter the schedule as necessary, with notification to students.
Assessment Rubric(s)

Teacher Candidate Instruction and Assessment Plan

Assessment Objective
- The candidate will use knowledge of individual learning differences and
  assessment to develop an instructional plan for a student with developmental,
  learning, physical or linguistic differences, including a plan for assessing the
  student’s progress.

Rationale
Lesson planning is an essential skill for an educator. A lesson plan is a road map for
instruction. When planning teachers and teacher candidates need to answer four main
questions:
  Who are my students? (Context/Student Needs)
  What do my students need to know and be able to do? (Objectives)
  How will I get all students to know and do the new tasks? (Teaching and learning)
  How will I know they know what was taught? (Assessments)

The first step in planning is identifying the learning objectives for the lesson-based upon
student abilities, challenges, and prior knowledge. Before developing specific learning
activities, determine how you will assess if students have met the lesson objectives. Once
you know how you will assess student learning, you can develop activities that align
instruction with the assessment. Additionally, a teacher must consider student prior
knowledge, how to differentiate to meet student needs, and how to do so within the time
allotted. Lesson plans include pacing, transitions, checking for understanding, and ideas
for re-teaching or extending learning based upon student needs.

The planning process is the same whether you are planning a lesson for a class or for an
individual. For this assessment you will develop an instructional plan for a student with
developmental, learning, physical or linguistic differences, including a plan for assessing
the student’s progress.

Assessment Task Directions
Candidates will develop an individualized plan for a child with developmental, learning, physical, or linguistic differences within the context of the general environment and curriculum that includes the following sections:

**Section 1. Description of the individual student** that includes **cognitive, linguistic, social, emotional, and/or physical** developmental skill levels and abilities, interests and educational progress and **statement of educational need**.

**Section 2. Identification of and rationale for three learning objectives** that support meaningful learning outcomes for the student.

**Section 3. Description of and rationale for at least three evidence-based instructional strategies** that address the identified learning objectives and reflect the student’s **cognitive, linguistic, social, emotional, and/or physical** developmental skill levels and abilities, interests and educational needs.

**Section 4. Description of and rationale for instructional adaptations and accommodations needed, including the use of augmentative and alternative communication systems and assistive technologies or other appropriate technologies.**

**Section 5. Statement of plan for the assessment and documentation** of the student’s progress toward the identified objectives.

**Section 6: Reflection**: The candidate uses ongoing analysis and reflection to improve planning and practice.

</tr>
</tbody>
</table>

**Rationale for Instructional Adaptation**

The candidate knows a range of evidence-based instructional strategies, resources, and technological tools and how to use them effectively to plan instruction that meets diverse learning needs.

*InTASC 7(k) ACEI 2.3 CAEP 3c*

The candidate does not provide rationales that are aligned to the adaptations and accommodation and/or the relationship of the adaptations and accommodation to student educational needs is missing or unclear.

The rationales marginally provide evidence to support the adaptations and accommodations and the relationship of the adaptations and accommodations to student educational needs is unclear.

The rationales provide adequate evidence to support the adaptations and accommodations and the relationship of the adaptations and accommodations to student educational needs is clearly identified.

The rationales provide evidence-based support for the specific adaptations and accommodations and the relationship of the adaptations and accommodations to student educational needs is clearly and thoroughly identified.

**Section 5 Assessment and Documentation of Student Progress**

The candidate designs assessments that match learning objectives with assessment methods balances the use of formative and

The candidate does not describe an assessment plan that evaluates all student learning objectives or describes a plan that does not include documentation.

The candidate describes an assessment plan that evaluates all student learning objectives but does not include documentation.

The candidate describes an assessment plan that evaluates all student learning objectives and includes both formative and summative assessments that

The candidate describes an assessment plan that evaluates all student learning objectives, includes formative and summative assessments that
**Additional Program Content:**

**Important Information for Licensure Completion**

Beginning with Spring 2015 internships, all official and passing test scores must be submitted and in the Mason system (i.e. Banner/PatriotWeb) by the internship application deadline. Allow a minimum of six weeks for official test scores to arrive at Mason. Testing too close to the application deadline means scores will not arrive in time and the internship application will not be accepted.

Required tests:
- Praxis Core Academic Skills for Educators Tests (or qualifying substitute)
- VCLA
- RVE
- Praxis II (Content Knowledge exam in your specific endorsement area)

*For details, please check [http://cehd.gmu.edu/teacher/test/](http://cehd.gmu.edu/teacher/test/)*

**Endorsements:**

Please note that ALL endorsement coursework must be completed, with all transcripts submitted and approved by the CEHD Endorsement Office, prior to the internship application deadline. Since the internship application must be submitted in the semester prior to the actual internship, please make an appointment to meet with the Endorsement Specialist and plan the completion of your Endorsements accordingly.
CPR/AED/First Aid:
Beginning with spring 2015 internships, verification that the Emergency First Aid, CPR, and Use of AED Certification or Training requirement must be submitted and in the Mason system (i.e. Banner/PatriotWeb) by the application deadline. Students must submit one of the "acceptable evidence" documents listed at [http://cehd.gmu.edu/teacher/emergency-first-aid](http://cehd.gmu.edu/teacher/emergency-first-aid) to CEHD Student and Academic Affairs. In order to have the requirement reflected as met in the Mason system, documents can be scanned/e-mailed to CEHDacad@gmu.edu or dropped-off in Thompson Hall, Suite 2300.

Background Checks/Fingerprints:
All local school systems require students to complete a criminal background check through their human resources office (not through George Mason University) prior to beginning field hours and internship. Detailed instructions on the process will be sent to the student from either the school system or Mason. Students are strongly advised to disclose any/all legal incidents that may appear on their records. The consequence of failing to do so, whether or not such incidents resulted in conviction, is termination of the field hours or internship. Please Note: Your G-Number must be clearly noted (visible and legible) on the face of the document(s) that you submit.

Application
The internship application can be downloaded at [http://cehd.gmu.edu/teacher/internships-field-experience](http://cehd.gmu.edu/teacher/internships-field-experience)

Deadlines
Spring internship application:
- Traditional semester long internship: September 15

Fall internship application:
- Traditional semester long internship: February 15
- Year Long Internship: April 1 (All testing deadlines are August 1 immediately preceding the fall start; RVE deadline is December 1)
