COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT
EDUCATIONAL PSYCHOLOGY**

EDRS 811 (001)

Quantitative Methods in Educational Research

Fall 2009, Monday 4:30pm – 7:10pm

Innovation Hall Rm 129

PROFESSOR

Name: Michelle M. Buehl, PhD

Office phone: (703) 993-9175

Office location: Robinson A Room 353 E

Office hours: Tues. 4:00pm- 6:00pm, Wed. 3:00pm-4:00pm or by appointment

Email address: mbuehl@gmu.edu

COURSE DESCRIPTION

The purpose of this course is to develop students' understanding of statistical ideas and procedures required for conducting statistical analyses and applications of quantitative methods in the practice of educational research. The course will reinforce and build upon concepts and skills acquired in EDRS 620. Students will learn through a combination of reading assignments, hands-on experience in using a computer program for data analysis, and application activities. Students will be expected to identify and report on quantitative methods used in published research (i.e., journal articles), to analyze data using the Statistical Package for Social Sciences (SPSS), and to provide written reports of methodology and results. *Prerequisites:* Successful completion of EDRS 620 (or its equivalent) or permission of instructor.

NATURE OF COURSE DELIVERY

This course will be taught using lectures, discussions, and group activities in a computer classroom. The course is technology-enhanced using Blackboard (<http://courses.gmu.edu>). Students are expected to have a MESA account (go to <http://password.gmu.edu> to set an account) and are responsible for any information posted on the Blackboard site.

For assistance with Blackboard students may email courses@gmu.edu, call (703) 993-3141, or go to Johnson Center Rm 311 (office hours: 8:30am-5pm). For general technical assistance, students may call (703) 993-8870 or go to the counter in Innovation Hall.

REQUIRED TEXT

Dimitrov, D. M. (2008). *Quantitative research in education*. New York: Whittier Publications.

RECOMMENDED TEXT

American Psychological Association. (2010). *Publication manual of the American Psychological Association* (6th ed.). Washington, DC: Author.

STATISTICAL SOFTWARE

Students are *not* required to purchase statistical software for this course. However, assignments will require the use of SPSS. This program is available for use in the computer labs on campus. Options for purchasing SPSS can be investigated at http://www.spss.com/vertical_markets/education/online.htm, including an option to lease the program from six months to one year (<http://estore.e-academy.com/index.cfm?loc=spss/main>).

COURSE REQUIREMENTS

It is expected that student will:

- (1) Read all assigned materials before coming to class.
- (2) Participate in classroom activities that reflect critical reading of materials.
- (3) Complete in class and homework assignments and quizzes.
- (4) Design and conduct a mini-research study.
- (5) Complete an in class midterm and final examination.
- (6) Attend each class session.

COURSE EVALUATION

1. Quizzes (5%)

A brief quiz (i.e., 10 minutes) will be given at the start of every other class session, assessing material discussed since the last quiz. Students who miss a quiz may not make up the quiz unless previous arrangements have been made. The lowest quiz grade will be dropped. Students may bring one 8.5 x 11 piece of paper with notes on the front and back and should also have their own calculator for each quiz.

2. In-Class/Homework Assignments (20%)

Students will complete homework assignments throughout the semester. These assignments are meant to apply and practice the course material.

For assigned problem sets, handwritten work is acceptable but should be neat and readable. When referring to computer printouts please cut and paste the appropriate output into your homework so that it is clear where you got the numbers provided in your response. Be sure to label and explain clearly. Students may consult with each other for these assignments but each student is to turn in a complete homework assignment that represents their own work.

3. Midterm and Final Examination (25% each—50% total)

Two exams will be given, as indicated in the course schedule, assessing material from the course.

4. Mini-Research Study (25%)

Working individually or in pairs, students will develop and conduct a mini-research study using data from an educational setting that reflects what they have learned from the course. Specifically, the following analyses must be included: 1) Chi-square test for association, 2) Multiple regression, and 3) ANCOVA or Two-Way ANOVA. For the study, students may collect data or use existing data, but may not create data. (Note that the collection of new data may require HSRB approval.) A research paper describing the study is due Friday, December 11, 2009. The paper should be written using the APA Publication Manual Guidelines and contain the following (see Appendix for rubric):

1. *Introduction*: Identify broad topic of interest; conduct a *brief* literature review; discuss significance of the proposed study; state purpose and hypotheses/research questions.
2. *Methods*: Describe sample, measures, procedures/data collection, and data analysis.
3. *Results*: Describe the results of analyses conducted in test and include appropriate tables and figures.
4. *Discussion and Conclusions*: Discuss the meaning of the findings as they relate to the broader literature, identify limitations, and discuss directions for future research.
5. *Reflection on the process*: After completing the research study, reflect on that experience. What did you learn from it? How do you think course material helped you carry out the study?

Grading Policy

Your final grade for this class will be based on the following:

A+ = 98 – 100%	A = 93 – 97.99%	A- = 90 – 92.99%
B+ = 88 – 89.99%	B = 83 – 87.99%	B- = 80 – 82.99%
C = 70 – 79.99%	F < 70%	

COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT STATEMENT OF EXPECTATIONS:

All students must abide by the following:

- Students are expected to exhibit professional behavior and dispositions. See gse.gmu.edu for a listing of these dispositions.
- Students must follow the guidelines of the University Honor Code (http://www.gmu.edu/catalog/apolicies/#TOC_H12) for all course assignments.
 - Students must not give or receive unauthorized assistance.
 - Plagiarism is also a violation of the honor code. Please note that:
 - “Plagiarism encompasses the following:
 1. Presenting as one's own the words, the work, or the opinions of someone else without proper acknowledgment.
 2. Borrowing the sequence of ideas, the arrangement of material, or the pattern of thought of someone else without proper acknowledgment.”
 (from Mason Honor Code online at <http://mason.gmu.edu/~montecin/plagiarism.htm>)
 - Paraphrasing involves taking someone else's ideas and putting them in your own words. When you paraphrase, you need to cite the source.
 - When material is copied word for word from a source, it is a direct quotation. You must use quotation marks (or block indent the text) and cite the source.
 - Electronic tools (e.g., SafeAssign) may be used to detect plagiarism if necessary.
 - Plagiarism and other forms of academic misconduct are treated seriously and may result in disciplinary actions.
- Students must agree to abide by the university policy for Responsible Use of Computing. See <http://mail.gmu.edu> and click on Responsible Use of Computing at the bottom of the screen.
- Students with disabilities who seek accommodations in a course must be registered with the GMU Disability Resource Center (DRC) and inform the instructor, in writing, at the beginning of the semester. See www.gmu.edu/student/drc or call 703-993-2474 to access the DRC.

ADDITIONAL CLASS POLICIES**Paper Format**

Research papers should be submitted in APA format with 1 inch margins on all sides, double-spaced, 12-point Times New Roman font, include a separate title page, and be proofread for spelling, grammar, and clarity errors. *Papers not following this format may be automatically reduced by up to a letter grade.*

Late Assignments

Assignments are due at the start of class on the assigned due date. If an assignment must be turned in late or outside of class, students may give the assignment to me in person, leave the assignment in my faculty mailbox (Robinson A Room 309), or email the document. If an assignment is left in my mailbox, send an email to indicate that it is there. **DO NOT** slide assignments under my office door. Assignments submitted this way will not be accepted or graded and will be considered missing. Late assignments will be marked down by half a letter grade for each day the assignment is late.

Computer Use in Class

All course sessions are currently schedule to be held in Innovation Hall Room 129. Each student in the course will have access to a computer. During class time, please refrain from checking email or conducting activities on the computer that are not directly related to the class session.

Class Environment

Help to foster a positive learning environment by respecting the opinions and contributions of others. Also, cell phones should be turned off or put on silent mode so as to not effect the learning of those around you.

TENTATIVE COURSE SCHEDULE

Date	Topic	Assigned Reading	Assignment Due Dates
Mon 8/31	Variables and measurement scales Concepts in education research	Chps 1, 4 Review Chps 2, 3, 5 Usher & Pajares (2006)	
Mon 9/7	LABOR DAY—NO CLASS		
Mon 9/14	Review of introductory statistics Hypothesis testing: One- and Two-sample case for the mean	Chps 6 & 7 Chp 8 (pp. 92-95)	
Mon 9/21	Hypothesis testing: One- and Two-sample case for the mean	Chp 8	Quiz 1 HW 1: Organizing Data & Normal Distribution
Mon 9/28	Hypothesis testing: One- and Two-sample case for the mean	Chp 8	
Mon 10/5	Chi-square tests for goodness-of-fit and association	Chp 12 pp. (170-181)	Quiz 2 HW 2: Tests of the Mean
Tues 10/13	Correlation Simple regression	Chp 10 (pp. 133-142) Chp 10	HW 3: Chi-square
Mon 10/19	MIDTERM EXAMINATION		
Mon 10/26	Part and partial correlation Multiple Regression	Chp 11 Chp 13	
Mon 11/2	Multiple regression	Chp 13	Quiz 3
Mon 11/9	One-factor analysis of variance (ANOVA)	Chp 14	HW 4: Multiple Regression
Mon 11/16	One-factor analysis of variance (ANOVA) Online Effect Size Lecture and Activity	Chp 14	Quiz 4 Online effect size quiz
Mon 11/23	Analysis of covariance (ANCOVA)	Chp 16	
Mon 11/30	Analysis of covariance (ANCOVA) Two-factor ANOVA (Day after Thanksgiving)	Chps 15 & 16	Quiz 5 HW 5a: ANOVA
Mon 12/7	Two-factor ANOVA Review and Project Discussion	Chp 15	HW 5b: ANCOVA
Mon 12/14	FINAL EXAMINATION		Research Paper due Fri. 12/11

- Notes: 1. Last day to drop no tuition liability: Sept 15th
2. Last day to drop with 33% penalty: Sept 22nd
3. Last day to drop (67% penalty): Oct 2nd

Appendix
Quantitative Methods in Education Research (EDRS 811)
Research Paper Rubric

Name: _____

Date: _____

Semester: _____

Grade: _____

GENERAL EVALUATION CRITERIA:

- *Clarity and organization*
- *Comprehensiveness of content*
- *APA style*

MAXIMUM SCORE: 30 pts

PERFORMANCE ELEMENTS	POINTS			
	1	2	3	4
Cover page	max = 1 pt			
Clearly organized with title, name, date, and boiler plate (partial fulfillment, Instructor's name, and school) in APA style				
Introduction	max = 5 pts			
a. Statement of the nature of the problem and its importance (include a description of some recent studies related to the issues)				
b. Justification of the need for this study				
c. Statement of specific research questions.				
Methods Section	max = 8 pts			
a. Participants: description of the sample (size, subgroups, demographic characteristics)				
b. Measures: description of the data (instruments, scales, reliability of scores)				
c. Procedures and data collection: description of the data collection method (e.g., using existing records on student)				
d. Statistical Data Analysis: Description of the statistical methods and procedures used to address the research questions in the project				
Results Section	max = 7 pts			
Present the results obtained with the statistical data analysis for each research question				
a. within text of the results section,				
b. in APA formatted tables (each on a separate page after references, NOT SPSS tables), and in APA formatted figures (each on a separate page after tables).				
Discussion/Conclusions Section	max = 7 pts			
a. Conclusions drawn from the results [findings and implications for theory and/or practice]				
b. Statement of limitations				
c. Recommendations for future research				
References and Citations	max = 1 pt			
Inclusion of recent studies appropriately cited in text and in reference list in APA style				
Reflection	max = 1 pt			
Inclusion of a thoughtful reflection on the research study experience and how it contributed to your learning
