

**GEORGE MASON UNIVERSITY
COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT
SPECIAL EDUCATION**

EDSE 544, 650 (Loudoun)

Adaptive Instructional Methods and Transition for Secondary Learners

Spring 2, 2010

Wednesdays 4:30 – 9:00 p.m. (3/9 – 5/18)

Stone Bridge H.S.

Professor: Dr. Jane A. Razeghi

Office phone: 703-993-2055 (prefer you use cell)

Cell phone: 703-624-4271

Office hours: By appointment

Email address: jrazeghi@gmu.edu

COURSE DESCRIPTION:

Focuses on best practices in curriculum, assessment, and instructional methods for students with disabilities who access the general curriculum and adapted curriculum. Covers functional academics, social/life skills, accommodations, and transition to community, workplace, and post-secondary education.

NATURE OF COURSE DELIVERY:

Course delivery will include the use of technology, media, cooperative and collaborative group activities, guest speakers, lecture, and site visits.

LEARNER OUTCOMES:

This course is designed to enable students to: a) design alternate assessments for secondary learners with disabilities to demonstrate learning outcomes and postsecondary interests and aptitudes; b) demonstrate an understanding of *research-based strategies* for facilitating transition into the community, workplace, and postsecondary environments; c) demonstrate how to implement cognitive strategies in self-regulation, study skills, attention, memory, motivation, and self-determination; and d) demonstrate knowledge of the federal and Virginia laws, Standards of Learning, and agencies that require and provide for transition, vocational, and rehabilitation services for students with disabilities at the secondary school level (middle & high school); e) Identify the role and responsibilities of the Individual Education Plan (IEP) teams as they strive to incorporate transition requirements into the IEP and principles of person-centered planning; and f) Identify organizations, services, networks, and the variety of state and local agencies that maximize the interagency effort involved in the transition process for students with disabilities.

PROFESSIONAL STANDARDS:

This course is part of the George Mason University, Graduate School of Education, Special Education Program for teacher licensure in the Commonwealth of Virginia in the special education areas of mild disabilities. This program complies with the standards for teacher licensure established by the Council for Exceptional Children, the major special education professional organization. As

such, the learning objectives for this course cover the following competencies for curriculum and methods for teaching individuals with mild disabilities, kindergarten through grade 12:

Standard 2. Development and Characteristics of Learners

Special educators know and demonstrate respect for their students first as unique human beings. Special educators understand the similarities and differences in human development and the characteristics between and among individuals with and without exceptional learning needs (ELN). Moreover, special educators understand how exceptional conditions can interact with the domains of human development and they use this knowledge to respond to the varying abilities and behaviors of individual's with ELN. Special educators understand how the experiences of individuals with ELN can impact families, **as well as the individual's ability to learn, interact socially, and live as fulfilled contributing members of the community.**

Standard 3. Individual Learning Differences

Special educators understand the effects that an exceptional condition can have on an individual's learning in school and **throughout life.** Special educators understand that the beliefs, traditions, and values across and within cultures can affect relationships among and between students, their families, and the school community. Moreover, special educators are active and resourceful in seeking to understand how primary language, culture, and familial backgrounds interact with the individual's exceptional condition to impact the individual's academic and social abilities, attitudes, values, interests, **and career options.** The understanding of these learning differences and their possible interactions provide the foundation upon which special educators individualize instruction to provide meaningful and challenging learning for individuals with ELN.

Standard 5. Learning Environments and Social Interactions

Special educators actively create learning environments for individuals with ELN that foster cultural understanding, safety and emotional well being, positive social interactions, and active engagement of individuals with ELN. In addition, special educators foster environments in which diversity is valued and individuals are taught to live harmoniously **and productively in a culturally diverse world. Special educators shape environments to encourage the independence, self-motivation, self-direction, personal empowerment, and self-advocacy of individuals with ELN.** Special educators help their general education colleagues integrate individuals with ELN in regular environments and engage them in meaningful learning activities and interactions. Special educators use direct motivational and instructional interventions with individuals with ELN to teach them to respond effectively to current expectations. When necessary, special educators coordinate all these efforts and provide guidance and direction to paraeducators and others, such as classroom volunteers and tutors.

Standard 7. Instructional Planning

Individualized decision-making and instruction is at the center of special education practice. Special develop **long-range individualized instructional plans** anchored in both general and special curricula. In addition, special educators systematically translate these individualized plans into carefully selected shorter-range goals and objectives taking into consideration an individual's abilities and needs, the learning environment, and a myriad of cultural and linguistic factors. Individualized instructional plans emphasize explicit modeling and efficient guided practice to assure acquisition and fluency through maintenance and generalization. Understanding of these factors as well as the implications of an individual's exceptional condition, guides the special educator's selection, adaptation, and creation of materials, and the use of powerful instructional variables. Instructional plans are modified based on ongoing analysis of the individual's learning progress. Moreover, **special educators facilitate this instructional planning in a collaborative context including the individuals with exceptionalities, families, professional colleagues, and personnel from other agencies as appropriate. Special educators also develop a variety of individualized transition plans, such as transitions from preschool to post secondary work learning contexts.** Special educators are comfortable using appropriate technologies to support instructional planning and individualized instruction.

Standard 8. Assessment

Assessment is integral to the decision-making and teaching of special educators and special educators use **multiple types of assessment information for a variety of educational decisions.** Special educators use the results of assessments to help identify exceptional learning needs and to develop and implement individualized instructional programs, as well as to adjust instruction in response to ongoing learning progress. Special educators understand the legal policies and ethical principles of measurement and assessment related to referral, eligibility, program planning, instruction, and placement for individuals with ELN, including those from culturally and linguistically diverse backgrounds. Special educators understand measurement theory and practices for addressing issues of validity, reliability, norms, bias, and interpretation of assessment results. In addition, **special educators understand the appropriate use and limitations of various types**

of assessments. **Special educators conduct formal and informal assessments of behavior, learning, achievement, and environments to design learning experiences that support the growth and development of individuals with ELN. Special educators use assessment information to identify supports and adaptations required for individuals with ELN to access the general curriculum and to participate in school, system, and statewide assessment programs.** Special educators regularly monitor the progress of individuals with ELN in general and special curricula. Special educators use appropriate technologies to support their assessments.

Standard 10. Collaboration

Special educators routinely and effectively collaborate with families, other educators, related service providers, and personnel from community agencies in culturally responsive ways. This collaboration assures that the needs of individuals with ELN are addressed throughout schooling. Moreover, special educators embrace their special roles as advocate for individuals with ELN. **Special educators promote and advocate the learning and well being of individuals with ELN across a wide range of settings and a range of different learning experiences.** Special educators are viewed as specialists by a myriad of people who actively seek their collaboration to effectively include and teach individuals with ELN. **Special educators are a resource to their colleagues in understanding the laws and policies relevant to individuals with ELN. Special educators use collaboration to facilitate the successful transitions of individuals with ELN across settings and services.**

REQUIRED TEXTS:

1. Sitlington, P. L., Neubert, & Clark, G. M. (2010). *Transition Education and Services for Students with Disabilities (5th Ed.)*. Boston: Pearson Education, Inc.
2. Steere, D.E., Rose, E., & Cavaiuolo, D. (2007). *Growing up: Transition to Adult Life for Students with Disabilities*. Boston: Pearson Education, Inc.

COURSE REQUIREMENTS:

- All assignments are due on the dates indicated. Consult with the professor *in advance* if there is a problem. In fairness to students who make the effort to submit papers on time, points per day will be deducted from your grade for late papers unless I have agreed to an extension. Please retain a copy of your assignments in addition to the one you submit.
- All assignments should reflect graduate-level spelling, syntax, and grammar. If you experience difficulties with the writing process you will be required to document your work with the GMU Writing Center during this course to improve your skills.
- Course participants wishing to suggest other learning activities may, with my approval, substitute these for a required activity.
- The major portion of your learning in this course will be the result of your personal involvement in the content provided and in your willingness to incorporate in-class content and the readings into your repertoire of knowledge and skills. My role in your learning is to be a facilitator and to provide a favorable environment in which learning can take place; however, the major responsibility must necessarily remain with you.

Grading Scale:

95-100% = A

90-94% = A-

87-89% = B+

80-86% = B

70-79% = C, < 70% = F

Expectations:

- Students are expected to (a) attend all classes during the course, (b) arrive on time, (c) stay for the duration of the class time and (d) complete all assignments. Attendance, timeliness, and professionally relevant, active participation are expected for a grade of B or better. Attendance at all sessions is very important because many of the activities in class are planned in such a way that they cannot necessarily be recreated outside of the class session. Please notify me *in advance* by phone or email if you will not be able to attend class.
- In-depth reading, study, and work on course requirements require outside class time. Students are expected to allot approximately three hours for class study and preparation for *each* credit hour weekly in addition to papers and assignments.
- Use APA guidelines for all course assignments. This website links to APA format guidelines. <http://www.apastyle.apa.org>
We will use person-first language in our class discussions and written assignments (and ideally in our professional practice). Please refer to “Guidelines for Non-Handicapping Language in APA Journals” <http://www.apastyle.org/disabilities.html>. We will also strive to replace the term “Mental Retardation” with “Intellectual Disabilities” in our oral and written communication in accordance with terminology choices in the disability community.
- **Email:** Please note that your GMU email will be used exclusively for this course: Please activate and forward your gmu email to your most-checked account. Go to <http://mail.gmu.edu>. Click on Options tab at the top of the page. Click on Settings link on the left of the page. Type in your most-checked email account in the box labeled Mail Forwarding.
- Be an Informed Student!
Negotiating all the requirements for your Master’s and/or VA Licensure is extremely complex. It is imperative that you schedule a phone or in-person appointment with the Special Education Advisor, (Jancy Templeton (jtemple1@gmu.edu), 703/993-2387). This will ensure that you rectify any outstanding issues, are timely with all necessary paperwork, and are ultimately in good standing to graduate on time.

Using Blackboard:

GMU’s Blackboard will be used to post important information and presentations for this course and for you to check grades and communicate with your classmates.

You should check Blackboard at least once a week and right before class to make sure you are informed about class/GMU issues.

Your GMU email address will be entered in the Blackboard system.

The following is how you will access the Blackboard-GSE Login Page:

Enter the URL <http://courses.gmu.edu> into your browser location field.

Click on the Login button.

Enter your email Username & Password

COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT STATEMENT OF EXPECTATIONS:

All students must abide by the following:

- Students are expected to exhibit professional behavior and dispositions. See <http://gse.gmu.edu/facultystaffres/profdisp.htm> for a listing of these dispositions.
- Students must follow the guidelines of the University Honor Code. See http://www.gmu.edu/catalog/apolicies/#TOC_H12 for the full honor code. Students in this course are expected to exhibit academic integrity at all times. Be aware that plagiarism is presenting someone else's work as your own. **Whether the act is deliberate or unintentional is irrelevant.** You must take great care to give credit to an author when you borrow either exact words or ideas. Generally, if you use 4 or more words in a row you should use quotation marks and a proper APA citation. Remember that plagiarism is a very serious offense and can result in dismissal from the University. Evidence of plagiarism or any other form of cheating in this class will result in a zero on that assignment and a report of the incident to the Dean's Office.
- Students must agree to abide by the university policy for Responsible Use of Computing. See <http://www.gmu.edu/facstaff/policy/newpolicy/1301gen.html>.
- Click on responsible Use of Computing Policy at the bottom of the screen.
- Students with disabilities who seek accommodations in a course must be registered with the GMU Office of Disability Services (ODS) and inform the instructor, in writing, at the beginning of the semester. See <http://ods.gmu.edu/> or call 703-993-2474 to access the ODS.

PERFORMANCE-BASED ASSESSMENTS AND EVALUATION CRITERIA:

There are 4 Major Assignments for EDSE 544.

MAJOR ASSIGNMENT 1: Blackboard Discussion Boards or Quizzes (5 points)

Several Blackboard discussion board topics or in class quizzes will be posted concerning transition issues for students with disabilities. If a Blackboard Discussion, students are responsible for responding to both the topic and their peers' responses. Responses should thoroughly address the prompt and reflect readings (such as the issues chapters at the end of each of the two texts), class discussions, and personal insights.

MAJOR ASSIGNMENT 2: Site Visit to a Community Resource/Agency or School Service That Facilitates Transition Skills (25 Points Total)

Visit a transition resource either in the community or within a school system and describe the services available to youth with mild disabilities. A write-up should include services, accommodations, description of the agency/office, and your questions for staff. The "lens" for this visit should be "what opportunities exist for youth with mild disabilities through this avenue during and/or after high school?" Include copies of materials available at center, agency, or office. Unless

students sign up for the tour of professional technical center arranged by the professor, they will need to make an appointment at another type of program. Acceptable options for this assignment include a school career center, One-Stop Center, vocational evaluation site, Virginia Department of Rehabilitation Services office, local Community Services Board, Job Placement/Training program, and other suggestions from your professor. The report MUST include a synthesis section that integrates the information from the site visit referencing professional literature on transition and career education.

MAJOR ASSIGNMENT 3: Unit Plan for Secondary Learners with Mild Disabilities: Integration of Career/Transition Education into the General Curriculum: (35 points)

This is the signature assignment, which MUST be submitted electronically for inclusion in Taskstream. Every student registered for any EDSE course including this semester is required to submit signature assignments to TaskStream (regardless of whether a course is an elective, a one-time course or part of an undergraduate minor). TaskStream information is available at <http://gse.gmu.edu/programs/sped/>. Failure to submit the assignment to TaskStream will result in reporting the course grade as Incomplete (IN). Unless this grade is changed, upon completion of the required submission, the IN will convert to an F nine weeks into the following semester.*

The career/life skill integration unit should cover approximately five (**5**) **block-scheduled class periods** and use the appropriate *SECONDARY (middle or high school)* grade level Standards of Learning (SOLs) to teach in a content area (English, math, science, social studies or other secondary academic area of choice) at an identified secondary level. Make this something that a secondary teacher could actually use. A rubric for this assignment is included in this syllabus.

These lessons are to include a variety of activities, teaching strategies, and assessment tools to match the needs of the learners, the topic being taught, and the resources available. In the plans, the students should be actively engaged in activities at least half of the time. The goal of the lessons should be to *infuse career education or critical life skills* into content area instruction as described in a course of study and the SOL(s) for that grade level and subject. Find and/or create each activity to be completed by the students. If a published activity is selected, its reference is cited.

The following information may assist in developing this project:

Step 1. Standards of Learning.

- Obtain a curriculum (often referred to as a program of study or curriculum frameworks) from general education at the *secondary* level. Locate and clearly identify the related Standards of Learning (SOLs). Curriculum Frameworks for major content areas can be found at:
<http://www.pen.k12.va.us/VDOE/Instruction/sol.html>
SOLs can be found on the Virginia Department of Education website:
<http://www.pen.k12.va.us/VDOE/Superintendent/Sols/home.shtml> and
<http://www.pen.k12.va.us/VDOE/Instruction/sol.html>
- Be sure to specify the teaching situation and the students: What kind of class? What kind of students? What kind of instructors? What kind of resources?

Step 2. Integration of Career Development/Life Skills within an Academic Lesson.

- Using the *secondary* general education curriculum (or program of study) and the Standard(s) of Learning (SOL), develop 5 (or more) well-designed lessons (a mini-unit) which will cover five (or more) block sessions of content and will reflect the **integration of career development/life skills activities**.
- These lessons must relate to one another at the thematic level. A **calendar** must be developed to show when and how these lessons will be incorporated into the students' class.

Step 3. SOL Goals and Objectives.

- Identify the Standards of Learning (SOL) upon which the lessons are based.
- List general education goals for each lesson. These are to be based on the Standards of Learning (SOL) that you identified. Please indicate which one(s) and for which grade level and subject that you select.
- Then, identify **what career concepts/life skills** will be infused into the lesson, and write specific, measurable objectives for each lesson.

Note: Properly written **instructional objectives** have four components all contained in one (1) complete sentence. They:

1. **Student(s)**
2. **Condition(s)** under which the “behavior” or “skill” is to be performed
3. **Behavior(s)** or skills that the student(s) is to perform
4. **Criteria** by which the “behavior or skill” will be evaluated. Does the student now know how to do this?

Step 4. Lesson Format

- Provide a detailed format for each lesson including Grade Level, Theme, SOL(s) addressed, Objectives, Introduction, Presentation, Guided and Individualized Practice, and Assessment. An example of a model lesson plan will be provided. A rubric is included in this syllabus.

Step 5. Adaptations & Accommodations.

- For the lesson(s), specify (in general) how the content will be **adapted or modified**, as well as, **methods of presentation** (evidence-based teaching strategies) to meet the needs of students with disabilities, especially those with learning disabilities, mild mental retardation, and /or emotional disabilities.
- What will be done differently for each of these populations?

Step 6: Assessment Plan for the Lessons.

- Summarize the multiple forms of assessment (formal and informal) that will be embedded in the lesson(s). **Construct actual portfolio assessment examples for each lesson and for the unit as a whole.**
- Include a discussion of **how the results** of each assessment will be used in instructional decision-making.

MAJOR ASSIGNMENT 4: Group Presentation on Standards-Based Assessments in Virginia - 25 points

Each small group will be assigned to present on one of the following topics about Virginia Assessment options/issues or other types of transition assessments for students with disabilities. The presentation should provide a detailed overview of the option/issue as well as examples of assessment artifacts. Each small group presentation should require approximately **30 minutes** of presentation time, not to exceed 45 minutes. Those less than 30 minutes will not be eligible for a grade of A. Other assignment topics may be assigned and researched with approval from the instructor.

1. [Virginia Substitute Evaluation Program \(VSEP\)](#)
2. [Virginia Grade Level Alternative \(VGLA\)](#)
3. [Virginia Alternate Assessment Program \(VAAP\)](#)
4. [Standard and Non-Standard Accommodation Issues \(description of, and decision factors\) for the SOL Assessments](#)
5. [Develop a work sample & identify the type of disability\(ies\) for which it could be used.](#) Use text and do a little research on this. In what class setting (inclusion, basic skills, self-contained, other) could you use this? Explain the purpose.
6. [Develop a “situational” assessment & identify the type of disability\(ies\) for which is could be used.](#) Use text and do a little research on this. In what class setting (inclusion, basic skills, self-contained, other) could you use this? Explain the purpose.
7. [Assessment Process for Department of Vocational Rehabilitation](#)
8. [Assessment Process for Woodrow Wilson Training Center](#)
9. [Other Employment Potential Assessments for Individuals with Disabilities \(Singer, Valpar, etc.\) - preapproved](#)

Process.

1. Sign up for an assessment topic (no more than 3 per small group).
2. Conduct research on the topic.
3. Together, come to consensus on the most important concepts that everyone should know.
4. Design a unique, possibly visually memorable mode of presentation [role play, video, mnemonics, game (must clear with professor so everyone doesn't do Jeopardy), music, or any combination of these or other]. Be creative.
5. Time your presentation so that one member does **not** exceed their allotted time. Each member of the small group must have an equal amount of time to present. Assign a timekeeper to keep time during the presentations. **Make copies** of your presentation Power Point). See rubric.

Class Participation – 10 points

Attendance at all classes is required, as is active participation in all assignments, group activities, and class discussions. Active participation includes the asking of questions and the presentation of one's own reflections regarding the readings and lectures, as well as interactive discussion. Listening and respectful considerations of the comments of others is a professional expectation. Students are to complete the required readings and assignments prior to the relevant class meetings. During each class meeting there will be opportunities to earn required points(s) for successful completion of graded in-class activities that cannot be "made-up" and may affect the student's final grade if missed. Personal reflections may be required.

	Course Requirement	Points
I	Blackboard &/or Quizzes	5
II	Site Visit	25
III	Unit Plan & Lesson Plans <ul style="list-style-type: none">• Introduction with SOLs (5 pts)• Unit calendar (10 pts)• Measurable gen education & career education objectives (2 pts)• Model lesson plan from each small group participant (18 pts)	35
IV	Assessment Presentation	25
V	Class Participation	10

This course will incorporate the evidence-based practices (EBPs) relevant to self-determination, facilitating transitions, alternative assessments, and social skills... Evidence for the selected research-based practices is informed by meta-analysis, literature reviews/synthesis, the technical assistance networks which provide web-based resources, and the national organizations whose mission is to support students with disabilities. We address both promising and emerging practices in the field of special education. This course will provide opportunities for students to take an active, decision-making role to thoughtfully select, modify, apply, and evaluate EBPs in order to improve outcomes for students with disabilities.

Measurable Goal/Objectives Statements Scoring Rubric 2 pts

Each person in the small group is to complete this assignment (individually) which will be included in the model lesson plan...

Assignment:

- a. Select an SOL from any **secondary-level curriculum** upon which you can base a general education objective. If you know the subject and topic for your curriculum unit with career education infused, you could use this measurable statement in your lesson plan. Visit the SOL website at <http://www.pen.k12.va.us/VDOE/Assessment/SWDsol.html>
- b. Use the above to write a one sentence measurable goal/objective that contains the 4 components reviewed during class lecture (**student, desired behavior, conditions, and criteria**)
- c. Repeat the sentence above and add the career ed concept that contains the 4 components reviewed during class lecture (**student, desired behavior, conditions, and criteria**) and that integrates a **career education** concept(s). “How to do this” will be reviewed in class prior to this assignment.

The career concept can focus on any of the different phases of career education (**awareness, exploration or preparation**). Use the same SOL as the basis for each statement.

- d. Have one other class participant review & verify that you have included all **four** necessary components (4) for a measurable statement (clearly identify these in your paper, referencing text page numbers) & that it includes a career education concept.
- e. Copy and submit rubric with assignment. Be prepared to revise this activity, if necessary.

Criteria	Exceeds Expectations	Meets Expectations	Unsatisfactory
A relevant SOL is clearly stated & identified that has been selected from a <u>secondary curriculum</u> upon which following measurable statements will be based Grade level for the SOL is indicated.			
A measurable statement is written for the SOL.			
The measurable statement written above is repeated, and a career concept is added. It includes all 4 components (student, desired behavior, conditions, and criteria).			

_____ of 5 points

Introduction to Curriculum Unit Rubric– 5 points

The career integration unit is a culminating activity that requires you to develop a 9-week unit based on the SOLs for a specific grade and subject at the secondary level.

Description of Integrated Career Unit Assignment:

The career integration unit should cover a 9-week period that uses the appropriate *SECONDARY* grade level Standards of Learning (SOLs) to teach a content area (math, science, English, social studies or other secondary academic area of your choice) at an identified secondary level. Make this something that could be used by a secondary special or regular teacher. This unit is to include a calendar, a variety of activities, teaching strategies, adaptations, and assessment tools to match the needs of the learners, the topic being taught, and the resources available. In your lesson plans, you should have the students engaged in hands-on activities.

Introduction to the Unit

The introduction to the unit should include the following:

Criteria	4 Exceeds Expectations	3 Meets Expectations	2 Unsatisfactory
1. Grade Level (middle or high school)			
2 List of Secondary SOLs identified & clearly stated that are relevant to the grade & subject area			
3. Content of subject that is addressed (English, math, science, etc.) at secondary level			
4. Overview of how & how often career concepts will be integrated throughout the calendar unit			

Total points _____

Calendar Rubric for the Career Integrated Curriculum Unit – 10 points

The calendar for the career integrated curriculum unit can be visually presented in a number of ways. It should cover a 9-week time period. Examples will be provided in class for review. Even though different members of the group may be responsible for different sections of the calendar, it should be compiled using one format (whatever it is that the group decides). In other words, it will not be presented using several different formats.

Criteria	Exceeds Expectations	Meets Expectations	Unsatisfactory
Calendar is uniformly formatted and seamless.			
9-weeks of instruction are included			
Career concepts are identified (at least once per week)			
Each person's model lesson plan (only one) is identified on the day it occurs on the calendar			

_____ of 10 points

Model Lesson Plan Checklist & Scoring Rubric

(Use this order & headings for each item in the lesson plan & submit a copy with your plan.)

1	Identification of grade level & identification of secondary curriculum area/subject	
2	SOL(s) to be covered is/are identified and stated	
3	General education objective is written in <u>one sentence</u> that is also measurable (student, conditions, behavior, criterion, & career concept)	
4	Career education/life skills concept. The general education objective is repeated with the addition of a career ed concept	
5	Materials are listed	
6	Opening statement or activity that is interesting & attention-getting. What will be the first things you say & do to engage your students in this lesson?	
7	<p>Lesson Body:</p> <ul style="list-style-type: none"> • Sequential Steps (1,2,3) are linear as in a “task analysis” & clearly show the evidence-based strategies to be used • Bullets or numbers are used instead of a running narrative <p>(If a PPT is to be used, you still need to spell out the steps you’ll use. Don’t just say you’ll show a PPT.)</p>	
8	<ul style="list-style-type: none"> • Career education and/or life skills are included & identified in “bold” in the lesson body 	
9	<ul style="list-style-type: none"> • At least two (2) <u>evidence-based practices or learning strategies</u> are identified that will be used in teaching this lesson to assist students with disabilities These should be in clearly identified & referenced in the lesson body in bold & included in the reference list at the end 	
10	<ul style="list-style-type: none"> • Guided practice is included 	
11	<ul style="list-style-type: none"> • Differentiated instruction is included 	
12	<ul style="list-style-type: none"> • Time estimate for each step/section of the lesson body? 	
13	Adaptations & modifications are identified by disability for students with ED, LD & MR in each of the lesson plans. These should be identified of each of the populations (in general), as well as anticipated I in the lesson body, specifically	
14	Closing for the lesson (activities have closings, too). What will you actually “say” to close this lesson?	
15	<p>Student assessment & evaluations are identified. This should relate directly to your measurable objective? How do you know the student "got it"?</p> <p>What instructional decisions will you be able to make based on this information?</p>	
16	<p>Teacher evaluation. How do you know you got the lesson across?</p> <p>How will you know that your lesson was effective? Interesting?</p>	
17	<p>Follow-up activities that are planned (be specific, not general)</p> <ul style="list-style-type: none"> -to review (when & how) -to extend learning (when & how)) -to provide independent practice (when & how) 	

ASSESSMENT RUBRIC for Unit Signature Assignment: CEC Standard 7 (cumulate 35 points)

		No Evidence	Beginning (Limited evidence)	Developing (Clear evidence)	Accomplished (Clear, convincing, substantial evidence)	Points
	Possible points for each criteria:					
	CRITERIA					
1	<u>Descriptions</u> of class and learners are provided 1 point					
2	<u>Grade level and content</u> of lessons is indicated (11 th grade English, Algebra I, etc) 2 points					
3	<u>SOLs</u> addressed in unit/lessons are clearly identified & related to the academic content. 2 points					
4	<u>Theme or topic</u> of the lessons is identified (e.g., money management) A <u>calendar</u> is included to show how/when these lessons will be incorporated into the course 3 points					
5	There is a <u>goal</u> for each lesson that addresses <i>both</i> the SOL and the career development/life skill component 2 points					
6	There are objectives for each lesson. Lesson objectives are based on the goals (above) and are <u>measurable</u> (include all 4 components of an instructional objective) 3 points					
7	The five lesson plans are presented using the <u>appropriate format</u> , and are appropriate for secondary learners (5) 7 points					
8	Possible <u>adaptations & modifications</u> are included for each lesson and are clearly identified and described 5 points					
9	<u>Portfolio assessments</u> for each lesson and the unit (actual examples) are included along with a discussion of how the results will be used in making instructional decisions. 5 points					
10	It is clear to the reader that <u>career education/life skills</u> have been infused into SOL-based lesson plans, reflected in implementation of the plans 5 points					

A+ (30 - 35); A (25 - 29); B+ (20 - 24); B (15 - 19); C (14 - 18); below 14 is failing
