Office hours:	Mondays, 1:00 pm – 4:00 pm and by appointment

Schedule information

Location: Thompson, LO13

Meeting times: Mondays, Wednesdays & Thursdays [various times], 6/24/19-7/18/19 --see Syllabus for dates and times

Course Description: EDLE 816 Instructional Leadership-Curriculum Policy and Practice Focuses on curriculum and instruction theory, policy, and practice with research emphasis on instructional leadership. Students develop research proposals to investigate instructional leadership in schools and districts and relate instructional leadership to their own specific research interests.

Course Objectives

This course aims to bridge theory, research and practice in curriculum and instructional leadership. In building this bridge, we will use theory and research to investigate critical components of curriculum policy and practice, including curriculum foundations, sources, design, development, implementation, management, and evaluation. Additionally, we will explore the role of school leaders in relation to these elements of curriculum policy and practice. Ultimately, students will use this exploration to build their own research agendas, specific to their research questions.

Within the course, students will explore at least the following questions:

- 1. Inquiry into curriculum:
 - a. What are the foundations and sources of the curriculum? Who decides which sources are most important and how?
 - b. What counts as curriculum theory? What variables are involved?

- c. How is curriculum designed, developed, implemented, managed and evaluated?
- d. How do design, development, implementation and evaluation vary in relation to sources and theory?
- 2. Inquiry into instruction
 - a. How does instruction vary in relation to curriculum decisions?
 - b. How does current instruction match the intent of curriculum?
- 3. Inquiry into curriculum leadership:
 - a. What counts as curriculum leadership?
 - b. How will we know it when we see it?
 - c. How and where does it occur?
 - d. Who displays it?

Student Outcomes

Students who successfully complete this course will be able to:

- 1. Demonstrate clear understanding of current issues in the policy and practice of curriculum and instruction
- 2. Engage in conversation to explore topics in their field of interest that represent opportunities for future investigation;
- 3. Use theory to frame researchable questions and use extant literature to inform research problems relating to curriculum leadership;
- 4. Design, conduct and report on a case study investigating selected questions.

National Standards

The following Education Leadership Constituent Council (ELLC) standard elements are addressed in this course:

1.3: Candidates understand and can promote continual and sustainable school improvement

2.1: Candidates understand and can sustain a school culture and instructional program conducive to student learning through collaboration, trust, and a personalized learning environment with high expectations for students.

2.2: Candidates understand and can create and evaluate a comprehensive, rigorous, and coherent curricular and instructional school program.

2.3: Candidates understand and can develop and supervise the instructional and leadership capacity of school staff.

3.4: Candidates understand and can develop school capacity for distributed leadership.

5.1 Candidates understand and can act with integrity and fairness to ensure a school system of accountability for every student's academic and social success.

5.5: Candidates understand and can promote social justice within a school to ensure that individual student needs inform all aspects of schooling.

6.2: Candidates understand and can act to influence local, district, state, and national decisions affecting student learning in a school environment

6.3: Candidates understand and can anticipate and assess emerging trends and initiatives in order to adapt school-based leadership strategies.

Nature of Course Delivery

Through readings, discussions, cooperative learning activities, case studies, presentations, and blogchats, students will learn the theory, practice and impact of curriculum and its leadership.

Content. The primary purpose of the course is to help students inquire into the leadership of curriculum and instruction.

Teaching and Learning. Each class will include a variety of activities and exercises. Specific process goals for the class are as follows:

- 1. Classes will reflect a balance of activities that enable students to participate actively in their development as scholars. To promote an atmosphere that allows us to accomplish this, we will:
 - a. start and end on time;
 - b. maintain (flexibly) a written agenda reflecting objectives for each class;
 - c. support our points of view with evidence;
 - d. strive to be open to new ideas and perspectives; and
 - e. listen actively to one another.
- 2. Student work will reflect what is expected from scholars. Students are expected to:
 - a. write papers that are well researched, proofread, submitted in a timely fashion, and consistent with APA guidelines;
 - b. participate actively in class discussions in a manner that challenges the best thinking of the class; and
 - c. provide constructive feedback to others both on their ideas and on their written work, striving to learn from each other and to test each other's ideas.
- 3. We will endeavor to create a classroom climate that approximates what we know about learning organizations. Therefore, it is important that we create a space that allows participants to try out new ideas and voice opinions without fear of ridicule or embarrassment. The hallmark of a learning organization is a balance between openness and constructive feedback; hence, everyone is expected to:
 - a. come fully prepared to each class;
 - b. demonstrate appropriate respect for one another;
 - c. voice concerns and opinions about class process openly;
 - d. recognize and celebrate each other's ideas and accomplishments; and
 - e. show an awareness of each other's needs.

Course Materials

No required text.

Recommended texts: Students who have not taken a general curriculum course (e.g., EDLE 616) may wish to read a general curriculum textbook such as:

Glatthorn, A.A., Boschee, F., Whitehead, B.M. & Boschee, B.F. (2016). Curriculum

leadership: Strategies for development and implementation. (Fourth Edition). Thousand Oaks, CA: Sage.

Ornstein, A.C. & Hunkins, F.P. (2013). *Curriculum: Foundations, principles, and issues*. (Sixth Edition).Upper Saddle River, NJ: Pearson.

Required and optional articles will be available through Blackboard. To complete required assignments successfully, students will need to have access to a personal computer with internet access, and the ability to use basic word processing and e-mail. Correspondence by e-mail will use your Mason e-mail account. We will also use Blackboard to facilitate communication, to post assignments and class handouts, and to submit written work for assessment.

Course Requirements, Performance-based Assessment, and Evaluation Criteria

Attendance

Students are expected to attend every class for its entirety. Maximum class participation points will be earned by students who attend all classes, are on time and do not leave early.

General Expectations

Consistent with expectations of doctoral courses in the Education Leadership program, **grading is based heavily on student performance on written assignments.** The assignments constructed for this course reflect a mix of skills associated with the application of research to education leadership contexts. Overall, written work will be assessed using the following broad criteria:

- 1. Application of concepts reflected in class discussion and readings
- 2. Creativity and imagination
- 3. Clarity, concision and organization

Additionally, a portion of the class grade will be based on participation and the contribution made to class discourse. The overall weights of the various performances are as follows:

Grading Weights

Class participation (20 percent). Students are expected to participate actively in class discussions, in group activities, and in serving as critical friends to other students. Attendance is expected for all classes. **If you must be absent, please notify me by e-mail or phone.** More than one absence may result in a reduction in participation points. Arriving at class more than 30 minutes late or leaving more than 30 minutes before the end of class may result in loss of points.

Written assignments (80 percent). Several different types of performance-based assignments will be completed during the semester. The directions for each assignment and a rubric for grading each assignment are described at the end of this syllabus. The assignments and the points assigned are:

- 1. Curriculum Journal Article(20 percent)
- 2. Literature Critique: Bridging Research to Practice (20 percent)
- 3. Leadership Case (40 percent)

Submission of assignments

All assignments must be submitted electronically, through Blackboard.

Late work. I expect all students to submit their work on time, meaning no later than by midnight of the due date. Assignments will not be accepted later than <u>48 hours</u> after a due date. Papers due on a day when you are absent must be submitted via Blackboard by the due date.

Rewrites. Students may rewrite a paper (other than the final paper) and re-submit the paper for re-grading within one week of receiving the paper back. I recommend that students not consider re-writing papers with scores of 3.6 or higher. If you wish to discuss your work, I am willing to do so at a time of mutual convenience. Papers that are initially submitted more than 48 hours late will not be graded.

Grading Scale

-	
A+	100
А	95-99
A-	90-94
B+	87-89
В	83-86
B-	80-82
С	75-79
F	0-74

Blackboard Requirement

Every student registered for any this course is required to submit all assessments to Blackboard. Evaluation of the performance-based assessment by the course instructor will also be completed in Blackboard. Failure to submit the assessment to Blackboard will result in the course instructor reporting the course grade as Incomplete (IN). Unless the IN grade is changed upon completion of the required Blackboard submission, the IN will convert to an F nine weeks into the following semester."

Core Values Commitment

The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: <u>http://cehd.gmu.edu/values/</u>.

GMU Policies and Resources for Students

Policies

- Students must adhere to the guidelines of the Mason Honor Code (see https://catalog.gmu.edu/policies/honor-code-system/)
- Students must follow the university policy for Responsible Use of Computing (see http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students **solely** through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see http://ds.gmu.edu/).
- Students must follow the university policy stating that all sound emitting devices shall be silenced during class unless otherwise authorized by the instructor.

Campus Resources

- Support for submission of assignments to Tk20 should be directed to <u>tk20help@gmu.edu</u> or <u>https://cehd.gmu.edu/aero/tk20</u>. Questions or concerns regarding use of Blackboard should be directed to <u>http://coursessupport.gmu.edu/</u>. '
- For information on student support resources on campus, see https://ctfe.gmu.edu/teaching/student-support-resources-on-campus

For information on the College of Education and Human development, please visit our website https://cehd.gmu.edu/students/.

EDLE 816.CO2 (Sturrock) Summer 2019 Tentative Class Schedule

To accommodate the learning needs of class members, the topic and reading schedule will be amended during the semester. When the tentative weekly schedule is revised, revisions will be posted on Blackboard.

Paper #1: Curriculum Journal Article (20 percent)

Rationale

An effective instructional leader understands and finds meaningful ways to connect the 'dots' of curriculum, instruction, assessment. Those same leaders find ways to articulate those connections—often bridging theory to practice—in many important ways. Those connections can be as follows: Professional Development; Professional Learning Community meetings; Parent Workshops; local and regional conferences; and sometimes, *the written word*.

Tasks

You are the managing editor of your school/system's successful educational journal. The editorial board has determined that the next issue will focus on the importance of [a] History, and [b] Philosophy as lenses to make sense of Curriculum Policy & Practice. You have been tasked to write the **lead article** on either an important Historical contribution, or a particular Philosophical perspective that has helped shaped policy and/or practice.

- 1. Choose either [a] a Historical contribution, or [b] a Philosophical 'approach'
- Locate the Glatthorn chapter on History, or [b] the Ornstein article on Philosophical perspectives. Choose ONE education era from Glatthorn, or ONE philosophical perspective from Ornstein...your choice should resonate with <u>both your professional and</u> research interests
- 3. Develop a thesis: *My research interest about______ is informed by research about _______ because______*
- 4. For your chosen area, research 4 empirical Journal articles that focus on understanding/explaining/extending/challenging your research interest
- 5. Select the best 2 articles and write a brief [500 word] precis on both, explaining how they connect to your thesis
- 6. Create your Chapter Outline, [including your thesis]
- In brief note form, describe how you intend to incorporate the following critical Curriculum components in your article: Essential Question[s], Essential Understandings, Essential Skills
- 8. Briefly explain how your article connects to Adult Learning theory research
- 9. Write a 350 word Introduction [including the thesis].

Your [draft] article should include the following written components: [a] strong thesis [b] Precis [2] of Journal research [c] clear chapter outline [d] notes on the inclusion of Curriculum components [e] clear connections to Adult Learning theory research, and [f] a compelling Introduction. The article should be 2500+ to 3000 words in length.

Criteria (Percent)	Levels of Achievement			
	exceeds expectations 90 to 100 %	meets expectations 80 to 89 %	approaching expectations 70 to 79 %	falls below expectations 0 to 69 %
Introduction (10) The introduction orients the reader to the purpose of the paper and presents the paper's thesis.	The introduction provides a roadmap regarding the author's research interest to either [i] history, or [ii] philosophy, and clearly foreshadows the paper's main points through the thesis.	The introduction provides an adequate orientation to the paper and a thesis [either/or] is presented. The thesis may not be analytical or clearly stated.	The introduction is vague and does not adequately orient the reader to the paper. Lacks a strong thesis.	The introduction does a poor job of orienting the reader to the paper.
Précis (25) Each précis should provide enough information about the articles used in this paper to give the reader a clear sense of the topic and its development.	Each précis is clear and informative. The author makes connections to the thesis so that the reader is able to grasp why the articles are important.	Each précis is generally clear, but some important points appear to be missing. Connections to the thesis may not be entirely clear.	One or the other précis lacks clarity and there is no apparent relationship to the thesis.	A précis may be missing or completely inadequate.
Outline (25) A clear and purposeful outline, from thesis to conclusion, is stated.	The outline provided clearly demonstrates the validity of the thesis. The argument follows logically from the thesis and includes research support.	The outline is logical and supportive of the thesis. Connections between published research and the author's developing argument may not be entirely clear.	The outline is greatly limited and somewhat vague. Connections to the author's research interests are unclear.	No outline is provided.
Curriculum Elements (20) The notes include clear connections [and rationales] for essential Qs, understandings and skills. Connects to adult learning theory.	The notes make clear connections as to the inclusion of essential Qs, understandings and skills. Clear explicit reference made to adult learning theory.	The notes follow a logical progression from thesis to conclusion; some reference made to adult learning theory.	The notes have only a tenuous relationship to the outline of the article. Connections to adult learning theory missing.	The notes do not follow logically from the outline of the article.
Introduction (10) The introduction to the Journal article is well drawn, and	The introduction is well drawn and showcases a strong thesis and implied development.	The introduction is generally well drawn, but the	The introduction is somewhat drawn but the thesis is weak and unconvincing.	The introduction suffers from

Paper #2: Literature Critique: Bridging Research to Practice 20 Percent

Rationale

An effective critic finds both positive and negative attributes of the subject she or he is criticizing. There is a great deal of literature that purports to explain how student performance can be improved through the adoption of a particular curriculum, a specialized pedagogy, or some sort of combination. Ideas are often promoted as being research-based. The ultimate claim that an article or a book might make is that it describes "best practices" in a particular subject area and/or for a specific population of students.

Understanding the difference between potentially good ideas that are grounded in theory and research and apparently good ideas that have no foundation in theory or research is important for both scholars and practitioners. As a scholar, you need to be able to distinguish among good research, poor and/or biased research, and no research. As a leader in your school or district, you will be more effective if you can help others make such distinctions. This assignment is intended to help you become a more highly developed connoisseur of publications in the area of curriculum and instruction.

Tasks

To complete this writing assignment, follow the steps below:

- 1. Find *five* articles that focus on curriculum and/or pedagogy. The articles can be theoretical, empirical, or practically oriented.
- 2. Select *two* articles from among the five to criticize along the following dimensions:
 - Is the purpose of the article clearly stated?
 - Is the article significant (e.g., does it present a new point of view, does it fill in a gap in the literature, and is it applicable in practice)?
 - Does the article have a persuasive theoretical foundation?

- Are the research design and methods clearly explained?
- Are the findings credible?
- What do you conclude about the validity and utility of the article?
 - Does the article inform practice in a responsible and logical way?
 - Does the article inform your own research interest?
- 3. For all of the above bullet points, be certain to explain <u>why</u> you believe as you do.
- 4. Write a coherent critique of each of the chosen articles. You may write a unified essay in which you have a thesis that covers both articles, or you may write independent essays for each article. Choose the option that you believe will be most helpful for thinking about your research interest. *Be sure to include a brief summary of each article so that the reader will have a reasonable idea of its content.*
- 5. Use proper citations and a write a *bibliography* (as opposed to a reference list) that includes all five sources you found.
- 6. Your paper is likely to be 5-7 pages.

Paper #3: Curriculum Leadership Case 40 Percent

Rationale

There is a wide variety of rather **persistent leadership dilemmas** in schools and other organizations. As students of leadership, and as aspiring leaders who seek to promote positive change in schools and other organizations, it is useful to describe some of these situations thoroughly as cases for analysis in leadership education and development.

Process

You will craft a case involving a leader's role in curriculum and instructional change. The paper itself should be modeled on the submission guidelines outlined by the editors of the *Journal of Cases in Educational Leadership*. From the JCEL website: *Cases are reviewed with the following criteria in mind*:

- Focuses on pertinent and timely issues of educational leadership.
- Relevant to graduate students preparing for educational leadership roles and for educational professionals currently in these roles.
- Useful in graduate teaching environments.
- Presents a practical and realistic problem that requires the integration of knowledge within and/or across disciplines.
- Stimulates self-directed learning by encouraging students to generate questions and access new knowledge.
- Provides the description of a problem that can sustain student discussion of alternative solutions.
- Describes the context in a rich fashion, including the individuals in the case.
- Encourages the clarification of personal and professional values and beliefs.
- Authenticates the connection of theory to practice.
- Includes teaching notes that facilitate the use of the case for leadership development.
- Is clearly written with specific objectives.

Product

All case submissions should be divided into two documents. The main document should be blinded, with no author or biographical information, and should include the following:

- Title
- Abstract. A short 100-word abstract describing the topic(s) of the case and a brief synopsis of the case.
- Text Sections should be typed in Times Roman font (12 pt.) with page numbers centered at the bottom of the page.
- Teaching Notes. All cases should include a one (1) page "Teaching Notes" that outlines how the material might be used in professional preparation programs for educational leaders. Within the "Teaching Note," authors should repeat the abstract describing the topic(s) of the case and a brief synopsis of the case.
- References should follow the style in the sixth edition of the *Publication Manual of the American Psychological Association*.
- ERIC Descriptors. Three (3) ERIC descriptors suitable for searching should be identified.

The second document should include identifying information, namely:

- Author Information Author's name and institutional affiliation.
- **Biographical Statement** Authors should provide a brief (2-3 sentences) biographical statement.

Ordinarily manuscripts should be between 1200-2000 words, exclusive of teaching notes.

Criteria	40 Percent Levels of Achievement				
(Percent)	exceeds expectations 90 to 100 %	meets expectations 80 to 89 %	approaching expectations 70 to 79 %	falls below expectations	
Abstract (15)	A clear and concise 100-word abstract describing the topics of the case and providing a synopsis of the case is included.	A 100-word abstract describing the topics of the case and providing a synopsis of the case is included, but it is somewhat hard to follow or omits important information.	An abstract is included, but it either exceeds recommended length or fails to provide a clear description of the case.	0 to 69 % The abstract is either missing or not at all useful in describing the case.	
Text of case (45)	A well thought out and stimulating case of leadership in curriculum and instruction that meets most or all elements of a JCEL case is provided.	A case that satisfies many elements of a JCEL case is provided.	A case dealing with the leader's role in change is provided, but it lacks detail and fails to satisfy many of the elements of a JCEL case.	The case description is either missing of fails to satisfy virtually any of the elements of a JCEL case.	
Teaching notes (20)	A well thought out single page of teaching notes is provided, suggesting sound approaches on how the case may best be used to develop effective leadership in the specialization.	A page of teaching notes is provided, suggesting approaches on how the case may best be used to develop effective leadership in the specialization.	Teaching notes are provided but are either hard to follow or suggest approaches on how the case may be used that are unclear or do not make sense given the facts of the case.	Teaching notes are omitted or fail to connect well to any aspects of the case presented.	
References (10)	The reference list is complete and nearly error-free, which reflects clear understanding of APA format.	The reference list is missing one or more references, includes references not cited, and/or has minor APA errors.	Missing multiple references and/or displays difficulty conforming to APA rules.	Frequent omissions and errors in APA format.	

Curriculum Leadership Case Assessment Rubric _____40 Percent _____

Organization of case (5)	The case is powerfully organized and fully developed	The case includes logical progression of ideas aided by clear transitions	The case is rough; writing is unclear and/or lacks transitions	The case is virtually impossible to understand; it lacks logical progression of events or ideas
Mechanics (5)	The case is nearly error-free which reflects clear understanding and thorough proofreading.	The case has occasional grammatical errors and questionable word choice.	The case contains errors in grammar and punctuation, but spelling has been proofread.	The case contains frequent errors in spelling, grammar, and punctuation.

Class Participation 20 Points

Criteria (Points)	Levels of Achievement				
	exceeds expectations 90 to 100 %	meets expectations 80 to 89 %	approaching expectations 70 to 79 %	falls below expectations 0 to 69 %	
Attendance (30)	Exemplary attendance and tardies	Near perfect attendance, few tardies	Occasional (2-3) absences and/or tardies	Frequent absences and/or tardies	
Quality of Questions and Interaction (20)	Most queries are specific and on point. Deeply involved in class dialogue. Challenges ideas and seeks meaning.	Often has specific queries, stays involved in class dialogue, though sometimes tentative or off- base.	Asks questions about deadlines, procedures, directions or for help with little specificity. Infrequently discusses ideas.	Rarely asks questions of substance.	
Effort (20)	Volunteers as appropriate and often leads in group settings. Engages and brings out the best in others.	Willingly participates with instructor and classmates. Engages others.	Reluctantly participates when asked. Seeks easiest duties in groups. Tolerates others.	Actively avoids involvement when possible. Complains about others. Uses large set of excuses.	
Demonstration of preparation for class (30)	Demonstrates preparation regularly by referring to previous learning, text and other sources to contribute to class discussion and is prepared for each and every class.	Demonstrates preparation regularly by referring to previous learning, text and other sources to contribute to class discussion.	Periodically demonstrates preparation and readiness for class.	Rarely demonstrates readiness for class
