ECED 523.003/600 Early Intervention for Infants & Toddlers with Disabilities:
Collaborative & Consultative Approaches
3 Credits, Fall 2019
NET 8/26 – 10/12
Thursdays/ 5:00 – 7:40 pm
Class Meetings: 8/29, 9/5, 9/12, 9/19, 9/26, 10/3, 10/10
Fairfax High School Room TBD

Faculty

Name: Christan Coogle, PhD
Office Hours: By Appointment
Office Location: Thompson Hall 1252, Fairfax Campus
Office Phone: 703-993-2377
Email Address: ccoogle@gmu.edu

Prerequisites/Corequisites

None

University Catalog Course Description

Covers methods of service delivery for infants and toddlers with disabilities and their families. Explores key aspects of consultation, interdisciplinary collaboration, service coordination, and family-centered services. Focuses on culturally responsive practices.

Course Delivery Method

This course will be delivered using a lecture and discussion format.

Learner Outcomes or Objectives

This course is designed to enable students to do the following:

1. Identify skills needed for consultation, case management, collaboration, coaching, mentoring, and co-teaching with families, educators, related service providers, and other human service professionals to support infant toddler access to and participation in natural, inclusive, least restrictive environments.
2. Explain how identified skills are applied for effective service coordination; interagency coordination; training, managing, and monitoring paraprofessionals; and facilitating transition of infants, toddlers, and their families from Part C services.
3. Discuss current key issues and controversies confronting early intervention programs and services.
4. Describe key components of IDEA 2004 (P.L. 108-446), Part C, and current regulations and procedures for early intervention service eligibility, Individualized Family Service Plan (IFSP) development, and transition planning.

5. Demonstrate knowledge of theories, including adult learning theory, and techniques of family-centered intervention that consider cultural and linguistic influences, family dynamics, and complex human issues.
6. Learn from families using formal and informal assessments, such as family observations and family interviews, to monitor progress.
7. Develop an IFSP, based on family needs and priorities as well as authentic assessment results, that includes functional outcomes and identifies service delivery to support success and functionality in all settings where same-age, typically developing peers would be located.
8. Create an intervention plan to support IFSP outcomes that integrates developmentally appropriate and routines-based intervention techniques in the areas of self-help, motor, cognitive, social emotional, and language and identifies methods for progress monitoring for growth compared to same-age, typically developing peers.
9. Describe approaches to coaching families to practice IFSP outcomes based on family priorities and individual child needs in identified developmental areas in order to enhance access and participation.
10. Discuss strategies for coaching parents and other education and care providers to support social and emotional skill development that assists with behavior management that is appropriate to the age of the child in his/her natural environment.
11. Exhibit standards of professionalism, ethical standards, and personal integrity with children, families, and professionals in the field and in interactions with classmates, the instructor, and others.
12. Use writing as an instructional and assessment tool to generate, gather, plan, organize, and to communicate for a variety of purposes; integrate correct written conventions (i.e., grammar, usage, mechanics, and spelling); and format using current APA style.

Professional Standards – Virginia Professional Studies Competencies, Virginia Early Childhood Special Education Endorsement Competencies, Virginia Early/Primary Education PreK-3 EPK3 Endorsement Competencies, Interstate Teacher Assessment and Support Consortium (InTASC) Standards, Council of Exceptional Children (CEC) and Division of Early Childhood (DEC) Standards, and National Association for the Education of Young Children (NAEYC) Standards

Upon completion of this course, students will have met the following professional standards:

Virginia Early Childhood Special Education Endorsement Competencies

Consultation and Collaboration
 Assessment Techniques
 Family-Centered Intervention
 Instructional Programs for Early Intervention

CEC Standard Elements

CEC 4.2 Beginning special education professionals use knowledge of measurement principles and practices to interpret assessment results and guide educational decisions for individuals with exceptionalities.

CEC 6.3 Beginning special education professionals understand that diversity is a part of families, cultures, and schools, and that complex human issues can interact with the delivery of

special education services.

- **Assignments and/or Examinations**

Virginia Early Intervention Certificate Courses – Initial Certification (15 points) on <http://veipd.org/elearn/course/index.php?categoryid=14>

The Virginia Early Intervention Professional Development Center offers an initial early intervention certification through five modules that are aligned with the Infant and Toddler Core Competencies for the Commonwealth. For this course, students are required to complete and pass the Initial Certification program, including Module 1 - Overview: Mission and Key Principles of Early Intervention, Module 2 – The Early Intervention Process, Module 3 – Effective Practices for Implementing Early Intervention, Module 4 – Responsibilities of Early Intervention Practitioners, Module 5 – Child Development, and Module 6 – Authentic Assessment. Students must submit a certificate of completion for each module to earn points for this assignment. Students will need these certificates during internship. It is the student’s responsibility to keep all certificates of completion to submit with the infant-toddler internship documentation.

Home Visit Reflection (25 points)

The purpose of this assignment is to (a) develop skills for collaboration and family-centered intervention, (b) learn from families via observations and interview by conducting a home visit, and (c) apply the cultural reciprocity process to reflect on the experience.

Part One (10 points)

Students will review resources on cultural reciprocity, effective collaboration, adult learning, and family guided routines-based intervention and use those resources to do the following:

1. Create a letter/email to a family to request a home visit that explains the purpose of the visit and what the family can expect during the visit;
2. Identify initial assumptions about the family being interviewed, the child, and the child’s special needs and describe how the student’s own cultural background and significant life events influence their assumptions about other families and children with special needs;
3. Develop questions to guide the interview during the home visit and a data sheet or chart to record observations of required information to complete Part 2 of the assignment; and

4. Create a plan that describes how the student will apply collaboration skills that integrate cultural reciprocity during the interview and observation.

Students will write a three- to four-page paper, using correct written conventions, covering the above points. Students will cite current research from the course textbook, class discussions and handouts, and/or other relevant peer-reviewed sources to support the information they provide. They will use in-text citations and include an APA-formatted reference list.

Part Two (15 points)

Students will conduct at least one, 1-hour home visit with a parent of a child, birth to age three with special needs. The purpose of the visit is to learn about the child; to learn about the family’s experience, goals, hopes, and dreams for their child; and to use collected information to develop a culturally responsive, family-centered intervention plan for a subsequent home visit. Students will aim to visit a family whose cultural, ethnic, or racial background is different in some way(s) from their own and meet with parents (or caregiving adults). If parents prefer not to meet at home, students might suggest another setting that is comfortable, so long as it is not at the child’s school. Students may conduct home visit in pairs, if the family agrees.

Students will keep in mind the four steps of the cultural reciprocity process as they learn about the child and family on the home visit:

Cultural Reciprocity Process	
Learn about child and family through observation and conversation	What are the family’s values, beliefs, and assumptions about the child, child development, and disability?
Reflect on your own thoughts and reactions	Reflect on your own values, beliefs, and assumptions. Explore how they are similar or different from that of the family.
Develop a culturally responsive plan	Through discussion and collaboration, determine the most effective way of adapting professional interpretations or recommendations to the value system of this family.
Explain your perspective / plan to the family	Acknowledge and give explicit respect to any cultural differences identified, and fully explain the cultural basis of the professional explanation.

Students should gather the following information during the home visit and summarize it in a 6- to 8-page, double-spaced paper that includes the following:

Context, Participants, and Interactions

Describe the setting. Who was present? Describe the relationship of each individual to the child and/or family.

Family Values, Beliefs, and Assumptions

Family's cultural background and significant events. How does the family describe their cultural background (e.g., religion, race, ethnicity)? What are some significant events in the life of the child or the family members?

Child Daily's Routine

What is the child's typical daily routine? What are some activities that the child and family enjoy? What are some activities with which the child/family has difficulty? What materials and toys are available and accessible to the child? What other individuals does the child interact with and where?

Family's Views on the Child, Early Development, and Disability

What are the family's goals, hopes, and dreams for their child? How does the family explain the child's special needs, delays, or disability? How does the family explain the current services the child receives? Has the family's cultural affiliations influenced their access to services?

Student Values, Beliefs, and Assumptions

Refer to your previously identified initial assumptions (in Part 1) and discuss how those assumptions affected the interview, and how your perspective has changed after interviewing this family. What are your expectations for this child and how are they shaped by your knowledge of early development and early intervention?

Reactions

What were your initial reactions to the family, the child, and the child's special needs? How did you reconcile differing assumptions and reactions? What are some dilemmas you faced in listening to the family story? What information from this home visit will you use to develop a culturally responsive intervention plan and why?

Intervention Plan

Based on the information you collected through the interview and observation process, briefly describe the family-centered intervention approach you will use and the initial area of focus for the next home visit.

Research Summary (10 points)

Students will research and summarize three articles from peer-reviewed journals focused on family-centered, routines-based intervention strategies in natural settings; coaching families; working with culturally diverse families; or another topic of interest that surfaced as you interviewed a family for the home visit assignment (e.g., trauma-informed care, neonatal abstinence syndrome, specific disabilities, etc.). Submit your topic to the instructor for approval before extensive research occurs. Students will also review the [DEC Recommended Practices](#) and highlight practices that are represented or can be integrated within the information found. Students will choose an option to summarize and share the information gathered, such as a written paper, an infographic, a PowerPoint or Prezi, a video, or other method approved by the

instructor. Students will be sure to summarize information and draw connections with DEC Recommended Practices. Students will keep in mind that a PowerPoint or Prezi should be highly visual with minimal amount of words on a slide, so they should consider recording themselves using Kaltura Capture on Blackboard or Screencast-O-Matic or, at a minimum, include the relevant written information in the notes sections of slides. Students must include a reference list in APA format.

Individualized Family Service Plan (IFSP) and Intervention (25 points)

This Key Assessment 10 Individualized Family Service Plan (IFSP) and Intervention Plan shows evidence of meeting CEC Standard Elements 4.2 and 6.3. This assignment must be submitted to Tk20 through Blackboard for a final grade to be recorded. The assessment description and scoring rubric are attached.

- **Other Requirements**

Attendance and Participation (25 points)

Because active participation and engagement are imperative for optimal learning, preparation for and participation in in-class and online activities will be evaluated based on the following criteria:

- Students attend class, arrive on time, and stay for the entire class period.
- Students use laptops and personal devices for instructional purposes only.
- Students complete readings and prepare for class activities prior to class as evidenced by their ability to discuss and write about the concepts presented and examined in the texts as well as participate fully in related activities.
- Students are actively involved in in-class and online learning experiences as evidenced by (a) participating in all activities, (b) engaging in small- and large-group discussions, (c) completing written work related to the activities, and (d) supporting the participation and learning of classmates.
- Students show evidence of critical reflective thinking through in-class and online discussions, activities, and written reflections.
- Students display professional dispositions at all times while interacting with the instructor and other students.
- Students complete participation activities across the semester that complement the scheduled course topic. Instructors will periodically collect artifacts from the activities. Students in attendance and who actively engage in the learning experience will receive credit for their efforts. Graded participation activities are not announced and are implemented at the discretion of the instructor.

Written Assignments

All formal written assignments will be evaluated for content and presentation. The American Psychological Association, Sixth Edition (APA) style will be followed for all written work. All written work unless otherwise noted must be completed on a word processor and should be proofread carefully. (Use spell check!) If students are not confident of their own ability to catch errors, they should have another person proofread their work. When in doubt, they should check the APA manual. Portions of the APA manual appear at the Style Manuals link on the Mason

library website at <http://infoguides.gmu.edu/content.php?pid=39979>. Students may consult the Writing Center for additional writing support.

Students will do the following:

1. Present ideas in a clear, concise, and organized manner. (Avoid wordiness and redundancy.)
2. Develop points coherently, definitively, and thoroughly.
3. Refer to appropriate authorities, studies, and examples to document where appropriate. (Avoid meaningless generalizations, unwarranted assumptions, and unsupported opinions.)
4. Use correct capitalization, punctuation, spelling, and grammar.
5. Type the paper with double spacing, indented paragraphs, 1-inch margins all around, and 12-point Times New Roman font.

• **Grading**

A = 95-100 A- = 90-94 B+ = 87-89 B = 80-86 C = 70-79 F = < 70

Incomplete (IN): This grade may be given to students who are passing a course but who may be unable to complete scheduled coursework for a cause beyond reasonable control.

All CEHD students are held to the university grading policies as described in the Academic Policies section of the current catalog, which can be accessed at <http://catalog.gmu.edu>. Those students seeking Virginia initial teaching licensure must earn a B- or better in all licensure coursework.

Professional Dispositions

Students are expected to exhibit professional behaviors and dispositions at all times. See <https://cehd.gmu.edu/students/policies-procedures/>.

Core Values Commitment

The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: <http://cehd.gmu.edu/values/>.

GMU Policies and Resources for Students

Policies

- Students must adhere to the guidelines of the Mason Honor Code (see <https://catalog.gmu.edu/policies/honor-code-system/>).
- Students must follow the university policy for Responsible Use of Computing (see <http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/>).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students **solely** through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see <http://ods.gmu.edu/>).
- Students must follow the university policy stating that all sound emitting devices shall be silenced during class unless otherwise authorized by the instructor.

Campus Resources

- Support for submission of assignments to Tk20 should be directed to tk20help@gmu.edu or <https://cehd.gmu.edu/aero/tk20>. Questions or concerns regarding use of Blackboard should be directed to <http://coursessupport.gmu.edu/>.
- For information on student support resources on campus, see <https://ctfe.gmu.edu/teaching/student-support-resources-on-campus>.

For additional information on the College of Education and Human Development, please visit our website: <https://cehd.gmu.edu/students/>.

Early Childhood Education Key Assessment 10 Individualized Family Service Plan (IFSP) and Intervention Plan

Description of Assessment

Early Childhood Education Key Assessment 10 is the Individualized Family Service Plan (IFSP). The IFSP plan and written intervention plan provide candidates an opportunity to develop an IFSP and use the information gathered to develop a written intervention plan. This assessment takes place in ECED 423/523 Early Intervention for Infants and Toddlers with Disabilities: Collaborative and Consultative Approaches

How the Assessment Aligns With the Standard

CEC Standard Elements

CEC 4.2 Beginning special education professionals use knowledge of measurement principles and practices to interpret assessment results and guide educational decisions for individuals with exceptionalities.

CEC 6.3 Beginning special education professionals understand that diversity is a part of families, cultures, and schools, and that complex human issues can interact with the delivery of special education services.

Description of Assignment

Candidates will develop an IFSP for a young child eligible for early intervention services and his/her family. They will be given a case study to develop the IFSP. In addition, they will submit an intervention plan to implement one IFSP goal.

Part 1: IFSP

Candidates will develop an IFSP based on assessments results included in the assigned case study using the IFSP form provided on Blackboard. They will complete the following sections on the IFSP (see Pletcher & Younggren, 2013, and <http://idea.ed.gov>):

- Child and Family Information
- Child and Family Activities
- Family Identified Resources, Priorities, and Concerns
- Team Assessment Narrative
- Outcomes of Early Intervention (include at least two appropriate service coordination short-term goals under Outcome #1 and develop two additional outcomes, including long-term functional goal, learning opportunities, short-term goals, and interventions)
- Service Needs to Achieve Early Intervention Outcomes
- Other services

When developing the two additional outcomes, candidates will apply measurement principles and practices to interpret the evaluation results and plan appropriate outcomes and services for the child and family.

Part 2: Written Intervention Plan

Candidates will use what they learned about the child while developing the IFSP to develop a written intervention plan for the child within the context of the family's identified resources, priorities, and concerns. Through the use of intervention strategies and tools, candidates will

write an intervention plan using the template attached that positively influences the child and family that will include the following:

- Written intervention plan using the provided template;
- Explanation of how interventions address family needs, culture, and diversity; and
- Rationale as to how the intervention strategies and tools address the selected outcome of early intervention and reflect the child’s strengths, areas of needs, and family concerns and priorities.

Candidates will cite current research from the course textbooks, class discussions and handouts, and/or other relevant sources to support their rationale, conclusions, and assertions. Candidates will use in-text citations and include a reference list per APA style guidelines.

Intervention Plan

<p>Outcome 1: <i>Identify one outcome from the IFSP and provide a rationale for why this outcome is appropriate for this child/family.</i></p> <p>1.</p> <p>Rationale:</p>
<p>Context/Family Priorities and Concerns: <i>Describe the family priorities and concerns.</i></p>
<p>Child and Family Strengths and Needs: <i>Describe the child and family strengths and areas of need. For a rationale, discuss how these strengths and needs will be used to meet/support the outcome.</i></p> <p>Rationale:</p>
<p>Natural Environment: <i>List and discuss several natural environments in which the outcome may be implemented for the child and family.</i></p> <p>Rationale:</p>
<p>Daily Routines and Activities: <i>List and discuss several opportunities throughout the child’s day in which intervention strategies may be implemented to assist the child and family with achieving the outcome.</i></p> <p>Rationale:</p>

Strategy 1: Describe the strategy and how it will be used with the child and family. Be sure to discuss the daily routine/activity in which the strategy is based, as well as all materials that will be used during the intervention session.

Rationale:

Strategy 2: Describe the strategy and how it will be used with the child and family. Be sure to discuss the daily routine/activity in which the strategy is based, as well as all materials that will be used during the intervention session.

Rationale:

Strategy 3: Describe the strategy and how it will be used with the child and family. Be sure to discuss the daily routine/activity in which the strategy is based, as well as all materials that will be used during the intervention session.

Rationale:

Considerations for Family Culture: Provide a brief summary of the family's cultural background. Describe how the family's culture affects the development of the IFSP, provision of services, and views on childhood exceptionalities.

Rationale:

Accommodations/Modifications/Assistive Technology: Considering the child and family strengths and needs, describe specific accommodations, etc. to be used to support the intervention strategies. The rationale will discuss why these accommodations, etc. are appropriate for this child/family and for use in early intervention.

Rationale:

Collaboration: List and discuss potential related service provider with whom you would collaborate to implement these strategies. Include information on the role of the collaborator; how the collaborator will work with you, the child, and the family; and any special considerations during this collaboration.

Rationale:

Progress Monitoring: *Describe how you will monitor progress toward achievement of this outcome.*

Rationale:

Scoring Guide for the Assessment

Early Childhood Education Key Assessment 10 Individualized Family Service Plan (IFSP) and Intervention				
	Exceeds	Meets	Approaches	Does Not Meet
Part 1: IFSP				
CEC 4.2 Beginning special education professionals use knowledge of measurement principles and practices to interpret assessment results and guide educational decisions for individuals with exceptionalities.	Candidate met expectations and applied current research to support learning opportunities and intervention strategies.	Candidate used assessment results to identify the child and family strengths and needs across developmental domains. Candidate developed two outcomes based on assessment results that are designed to meet the child's developmental needs and integrate information gathered from the family regarding their concerns and priorities. Candidate described developmentally appropriate learning opportunities, short-term goals, and interventions that will be used to meet the child and family needs.	Candidate used assessment results to identify the child and family strengths and needs across developmental domains. Candidate developed one to two outcomes based on assessment results that are designed to meet the child's developmental needs and integrate information gathered from the family regarding their concerns and priorities. However, candidate did not provide a detailed description of developmentally appropriate learning opportunities, short-term goals,	Candidate did not address the developmental needs of the child and/or the family resources, priorities, and concerns based on the interpretation of the results of the assessment across the five developmental domains and did not write outcomes based on the information gathered from the child and family.

			and interventions that will be used to meet the child and family needs.	
Part 2: Written Intervention Plan				
CEC 6.3 Beginning special education professionals understand that diversity is a part of families, cultures, and schools, and that complex human issues can interact with the delivery of special education services.	Candidate met expectations and provided current research to support components of the written intervention plan.	Candidate provided a detailed description of the cultural context within which intervention services will be provided and identified strategies that fit within this context. Candidate identified the natural environment for intervention services based on the family cultural considerations and identified resources, priorities, and concerns.	Candidate implied that intervention services would be provided within the cultural context of the family, however did not provide specific strategies or considerations individualized to the family.	Candidate did not address the cultural context within which intervention services will be provided based on the family's identified resources, priorities, and concerns.
