University Catalog Course Description

Focuses on individual health improvement by studying mental/emotional well-being, fitness, nutrition, drug abuse prevention, consumerism, safety and other topics.

Course Overview

The focus of this course is health for the 21st century. Through a variety of learning activities, students will be expected to master content in 10 content areas of personal health. Students will also be expected to apply strategies for change to improve personal health.

Course Delivery Method

This course is delivered using an asynchronous (not “real time”) format via the Blackboard learning management system (LMS) housed in the MyMason portal. Students will log in to the Blackboard course site using the Mason email name (everything before “@masonlive.gmu.edu”) and email password. The course site will be available on the first day of class an 8:00am.

Under no circumstances may candidates/students participate in online class sessions (either by phone or internet) while operating motor vehicles. Further, as expected in a face-to-face class meeting, such online participation requires undivided attention to course content and communication.

Technical Requirements

To participate in this course, students will need to satisfy the following technical requirements:

- High-speed Internet access with a standard up-to-date browser, either Internet Explorer or Mozilla Firefox is required (note: Opera and Safari are not compatible with Blackboard).

- Students must maintain consistent and reliable access to their GMU email and Blackboard, as these are the official methods of communication for this course.
- Students may be asked to create logins and passwords on supplemental websites and/or to download trial software to their computer or tablet as part of course requirements.
 - The following software plug-ins for PCs and Macs, respectively, are available for free download: Adobe Acrobat Reader: <https://get.adobe.com/reader/>
 - Windows Media Player: <https://windows.microsoft.com/en-us/windows/downloads/windows-media-player/>
 - Apple Quick Time Player: www.apple.com/quicktime/download/

Expectations:

- Course Week:
Because asynchronous courses do not have a “fixed” meeting day, our week will start on Monday, and finish on Sunday at 11:59pm.
- Log-in Frequency:
Students must actively check the course Blackboard site and their GMU email for communications from the instructor, class discussions, and/or access to course materials at least 3 times per week. Announcements are posted regularly and students are encouraged to log in daily to stay up-to-date on information.
- Participation:
Students are expected to actively engage in all course activities throughout the semester, which includes viewing all course materials, completing course activities and assignments, and participating in course discussions and group interactions.
- Technical Competence:
Students are expected to demonstrate competence in the use of all course technology. Students who are struggling with technical components of the course are expected to seek assistance from the instructor and/or College or University technical services.
- Technical Issues:
Students should anticipate some technical difficulties during the semester and should, therefore, budget their time accordingly. **Late work will not be accepted based on individual technical issues.**
- Workload:
Please be aware that this course is **not** self-paced. Students are expected to meet *specific deadlines* and *due dates* listed in the **Class Schedule** section of this syllabus. It is the student’s responsibility to keep track of the weekly course schedule of topics, readings, activities and assignments due. *****No late work will be accepted, no exceptions. It is your responsibility to keep up in this course and to use the syllabus provided.**
- Instructor Support:
Students can meet with the instructor via telephone, web conference or email, to discuss course content, or other content or other course related issues. Students should email the instructor to schedule a one-on-one session, including their preferred meeting method and suggested dates/times. I am always willing to advise you on other academic or health topics as well.
- Netiquette:
The course environment is a collaborative space. Experience shows that even an innocent remark typed in the online environment can be misconstrued. Students must always re-read their responses carefully before posting them, so as others do not consider them as personal offenses. *Be positive in your approach with others and diplomatic in selecting your words.* Remember that you are not competing with classmates, but sharing information and learning from others. All faculty are similarly expected to be respectful in all communications.
- Accommodations:

Online learners who require effective accommodations to insure accessibility must be registered with George Mason University Disability Services.

Learner Outcomes or Objectives
