# George Mason University College of Education and Human Development Mathematics Education Leadership

EDCI 702 6M2/6M4 – Internship in Mathematics Education 3 Credits, Spring 2020 Thursdays/7:20-10:00 p.m. Online Synchronous & Asynchronous

#### **Faculty**

Name: Theresa Wills, Ph.D.
Office Hours: By Appointment

Office Location: Thompson Hall, Room 2400B

Office Phone: (703) 993-6215; Cell Phone: (703) 740-7691

Email Address: twills@gmu.edu

#### **Prerequisites/Corequisites**

This course should be taken within the last two semesters of the MEL program or with special permissions from the instructor.

### **University Catalog Course Description**

Offers practical experiences and professional challenges for mathematics leaders in authentic educational settings. Activities emphasize school-based and classroom-based research and leadership. Develops the skills and abilities of the mathematics leaders to analyze classroom practice, investigate teaching and disseminate information about mathematics education in professional development settings for teachers.

#### **Course Overview**

Not Applicable.

#### **Course Delivery Method**

This course will be delivered online (76% or more) using a synchronous and asynchronous format via Blackboard Learning Management system (LMS) housed in the MyMason portal. You will log in to the Blackboard (Bb) course site using your Mason email name (everything before @masonlive.gmu.edu) and email password. The course site will be available on August 26, 2019.

Under no circumstances, may candidates/students participate in online class sessions (either by phone or Internet) while operating motor vehicles. Further, as expected in a face-to-face

class meeting, such online participation requires undivided attention to course content and communication.

# Technical Requirements

To participate in this course, students will need to satisfy the following technical requirements:

• High-speed Internet access with standard up-to-date browsers. To get a list of Blackboard's supported browsers see:

https://help.blackboard.com/Learn/Student/Getting Started/Browser Support#supported-browsers

To get a list of supported operation systems on different devices see:

https://help.blackboard.com/Learn/Student/Getting\_Started/Browser\_Support#tested-devices-and-operating-systems

- Students must maintain consistent and reliable access to their GMU email and Blackboard, as these are the official methods of communication for this course.
- Students will need a headset microphone for use with the Blackboard Collaborate web conferencing tool.
- Students may be asked to create logins and passwords on supplemental websites and/or to download trial software to their computer or tablet as part of course requirements.
- The following software plug-ins for PCs and Macs, respectively, are available for free download:
  - o Adobe Acrobat Reader: <a href="https://get.adobe.com/reader/">https://get.adobe.com/reader/</a>
  - Windows Media Player:

https://support.microsoft.com/en-us/help/14209/get-windows-media-player

o Apple Quick Time Player: www.apple.com/quicktime/download/

#### **Expectations**

- <u>Course Week:</u> Our course week will begin on the day that our synchronous meetings take place as indicated on the Schedule of Classes.
- <u>Log-in Frequency:</u> Students must actively check the course Blackboard site and their GMU email for communications from the instructor, class discussions, and/or access to course materials at least 3 times per week. In addition, students must log-in for all scheduled online synchronous meetings.
- <u>Participation:</u> Students are expected to actively engage in all course activities throughout the semester, which includes viewing all course materials, completing course activities and assignments, and participating in course discussions and group interactions.
- Technical Competence: Students are expected to demonstrate competence in the use of all course technology. Students who are struggling with technical components of the course are expected to seek assistance from the instructor and/or College or University technical services.

- <u>Technical Issues:</u> Students should anticipate some technical difficulties during the semester and should, therefore, budget their time accordingly. Late work will not be accepted based on individual technical issues.
- Workload: Please be aware that this course is **not** self-paced. Students are expected to meet specific deadlines and due dates listed in the Class Schedule section of this syllabus. It is the student's responsibility to keep track of the weekly course schedule of topics, readings, activities and assignments due.
- <u>Instructor Support:</u> Students may schedule a one-on-one meeting to discuss course requirements, content or other course-related issues. Those unable to come to a Mason campus can meet with the instructor via telephone or web conference. Students should email the instructor to schedule a one-on-one session, including their preferred meeting method and suggested dates/times.
- Netiquette: The course environment is a collaborative space. Experience shows that even an innocent remark typed in the online environment can be misconstrued. Students must always re-read their responses carefully before posting them, so as others do not consider them as personal offenses. Be positive in your approach with others and diplomatic in selecting your words. Remember that you are not competing with classmates, but sharing information and learning from others. All faculty are similarly expected to be respectful in all communications.
- Accommodations: Online learners who require effective accommodations to insure accessibility must be registered with George Mason University Disability Services.

# **Learner Outcomes or Objectives**

This course is designed to enable students to do the following:

Develop the skills and abilities of the mathematics specialist to analyze classroom practice, investigate teaching and disseminate information about mathematics education in professional development settings for teachers.

#### **Professional Standards (National Council of Teachers of Mathematics (NCTM))**

Upon completion of this course, students will have met the following professional standards:

#### A. Standard 6: Professional Knowledge and Skills

- **a.** Take an active role in their professional growth by participating in professional development experiences that directly relate to the learning and teaching of mathematics and to their development as a mathematics instructional leader.
- c. Plan, develop, implement, and evaluate mathematics-focused professional development programs at the school and/or district level; use and assist teachers in using resources from professional mathematics education organizations such as teacher/leader discussion groups, teacher networks, and print, digital, and virtual resources/collections; and support teachers in systematically reflecting on and learning from their mathematical practice.

d. Demonstrate mathematics-focused instructional leadership through actions such as coaching/mentoring; building and navigating relationships with teachers, administrators, and the community; establishing and maintaining learning communities; analyzing and evaluating educational structures and policies that affect students' equitable access to high quality mathematics instruction; leading efforts to assure that all students have opportunities to learn important mathematics; evaluating the alignment of mathematics curriculum standards, textbooks, and required assessments and making recommendations for addressing learning and achievement gaps; developing appropriate classroom or school level learning environments; and collaborating with school-based professionals to develop evidence-based interventions for high and low-achieving students.

# B. Standard 7: Elementary Mathematics Specialist Field Experiences and Clinical Practice

- **a.** Engage in a sequence of planned field experiences and clinical practice under the supervision of an experienced and highly qualified mathematics educator that involves the development of a broad experiential base of knowledge and skills working with a range of student and adult learners in a variety of school and professional development settings and the development of interpersonal skills critical for mentoring other teachers and working with school-based personnel, district administrators, and others.
- b. Develop and use leadership skills to improve mathematics programs at the school and/or district level, e.g., coaching/mentoring new and experienced teachers to better serve students; sharing critical issues, policy initiatives, and curriculum trends related to mathematics teaching; keeping abreast of local, state, or national policy decisions related to mathematics education; communicating to educational constituents about students, curriculum, instruction, and assessment; collaborating to create a shared vision and to develop an action plan for school improvement; and partnering with school-based professionals to improve each student's achievement.

#### **Required Texts**

Samaras, A. P. (2010). Self-study teacher research: Improving your practice through collaborative inquiry. Thousand Oaks, CA: Sage.

National Council of Teachers of Mathematics. (2014). *Principles to actions: Ensuring mathematical success for all*. Reston: NCTM.

#### **Course Performance Evaluation**

Students are expected to submit all assignments on time in the manner outlined by the instructor (e.g., Blackboard, Tk20, hard copy).

#### Assignments and/or Examinations

o Participation (20%)

#### Attendance

- Attend all scheduled online meetings for the entire class period is a course expectation and absence will impact your grade
- Arrive to all scheduled meetings on time
- Notify your instructor in advance if you will miss class and work with peers for missed material

#### Assignments

- Complete all assignments on time.
- All assignments will be assessed using posted criteria known to the student.
- For full consideration, all assignments are due to professor *electronically* in the digital drop box prior to the beginning of class on the day they are due, unless otherwise announced.
- All written assignments are to be word-processed using Times Roman 12 pt font, double-spaced, and POSTED electronically on our class Blackboard drop box. Please title each assignment with your last name and the name of the project/assignment, e.g., Smith. Professional Development Plan.

#### Readings, Class Activities, and Online Participation

- Complete all readings prior to class
- Participate in class and all online discussions with openness, consideration, and effort to "hear for" and "listen to" others as you also seek to be understood.
- Come to class prepared to contribute your critical reflections on both your own experiences and ideas presented by your critical friends.
- Demonstrate positive and collaborative professional dispositions towards colleagues during peer review along with a willingness to accept constructive criticism.

#### Critical Friend Work

- Work with a critical friend(s) to catalogue your research.
- Share weekly updates in class, send and respond to critical friend research memos. These memos are designed to co-support each other's research and to provide alternative perspectives on interpretation to increase the validity of your research. Critical friends provide support as well as a feedback loop to improve our practice. It is *critical* to have friends in research but critical friends are *not critical* in their approach with each other.
- Brainstorm ideas as a teacher about the classroom dilemma you are researching and ideas for strategies and lessons
- Share how you are integrating standards in meaningful ways

- Share peer review of your research report.
- Establish ground rules with "critical friends" and visit them often.
- Use your blackboard space to post and respond to each other's memos in the "Critical Friend." Critical friend inquiry (CFI) assignments are listed in the course schedule.

#### Weekly Researcher Log

Post your weekly updates and progress of your teacher research project each week on your personal researcher log. (See Self-Study Research Project Timeline in Chapter 2. Table 2.2). This is your tentative timeline and tool to self-regulate your progress and the research process.

| Category Exemplary 30 Points  Attendance/ Participates regularly   | Accomplished 27-29 Points Participates | <b>Developing</b> 25-26 Points | Undeveloped            |
|--|--|--------------------------------|------------------------|
|  | Participates                           | 25-26 Points                   |                        |
| Attendance/ Derticipates regularly   |  |                                | Below 25 Points        |

|  |  |                                |                        |
| supporting each other's efforts.   |  |                                |                        |

#### o Professional Development Design (30%)

• This is a Performance Based Assessment. The student will design, develop, implement and refine a professional development experience (1-2 hours) for teachers. This should include a plan for the session and a written reflection paper about the professional development experience (3-5 pages) For a

complete rubric and grading criteria please see the rubric at the end of the syllabus. The final report will be submitted on Blackboard in Tk20.

#### • Teacher Research Project Report & Presentation (50%)

This is a Performance Based Assessment. You are required to write a final report that includes the following sections: Rationale/Introduction, Research Question, Review of Related Literature, Method, Context, Participants, Data Collection, Analysis, Findings, Limitations, and Discussion including your reflections of self-study and implications for practice/further research. Your project should be useful to you and your students. A written report that includes the specific headings and subheading are listed in Chapter 12 of the textbook. For a complete rubric and grading criteria please see the rubric at the end of the syllabus. The final report will be submitted on Blackboard in Tk20.

In addition to the final report, students will submit assignments throughout the semester that will support the development and implementation of their project: a research proposal and a literature review. Finally, students will present their findings in the last class session of the semester. Information on presentations will be provided in class and on Blackboard.

## Other Requirements

All assignments require APA formatting:

American Psychological Association (2010). *Publication Manual of the American Psychological Association*. American Psychological Association: Washington, DC.

#### Attendance

It is your responsibility to attend all class sessions. You are held accountable for all information from each class session whether you are present or not. Reasons for any absence must be reported to the instructor in writing.

#### Tardiness

It is your responsibility to be on time for each class session. Reasons for any absence must be reported to the instructor in writing.

## Course Performance Evaluation Weighting

20% Participation

- Attendance
- Readings, Class Activities and Online Participation
- Critical Friend Work
- Weekly Researcher Log

30% Professional Development Design

50% Self-Study Teacher Researcher Project

## Grading

All assignments are to be turned in to your instructor on time. Late work will not be accepted for full credit. Assignments turned in late will receive a 10% deduction from the grade per late day or any fraction thereof (including weekends and holidays).

The final evaluation criteria utilizes the graduate grading scale and is as follows:

| A  | 93%-100% | $\mathbf{B}+$ | 87%-89% | C | 70%-79%   |
|----|----------|---------------|---------|---|-----------|
| A- | 90%-92%  | В             | 80%-86% | F | Below 70% |

# • For Master's Degrees:

Candidates must have a minimum GPA of 3.00 in coursework presented on the degree application, which may include no more than 6 credits of C. (Grades of C+, C-, or D do not apply to graduate courses. The GPA calculation excludes all transfer courses and Mason non-degree studies credits not formally approved for the degree).

#### • For Endorsement Requirements

Candidates must have a grade of B or higher for all licensure coursework (endorsement coursework).

# **Professional Dispositions**

Students are expected to exhibit professional behaviors and dispositions at all times. Education professionals are held to high standards, both inside and outside of the classroom. Educators are evaluated on their behaviors and interactions with students, parents, other professionals, and the community at large. At the College of Education and Human Development, dispositions may play a part in the discussions and assignments of any/all courses in a student's program (and thus, as part or all of the grade for those assignments). For additional information visit: https://cehd.gmu.edu/students/polices-procedures/

Note: Faculty reserves the right to alter the schedule as necessary, with notification to students.

#### **Core Values Commitment**

The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: <a href="http://cehd.gmu.edu/values/">http://cehd.gmu.edu/values/</a>.

#### **GMU Policies and Resources for Students**

#### **Policies**

- Students must adhere to the guidelines of the Mason Honor Code (see <a href="https://catalog.gmu.edu/policies/honor-code-system/">https://catalog.gmu.edu/policies/honor-code-system/</a>).
- Students must follow the university policy for Responsible Use of Computing (see http://universitypolicy.gmu.edu/policies/responsible-use-of-computing/).

- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students solely through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see <a href="https://ds.gmu.edu/">https://ds.gmu.edu/</a>).
- Students must silence all sound emitting devices during class unless otherwise authorized by the instructor.

# Campus Resources

- Support for submission of assignments to Tk20 should be directed to <a href="mailto:tk20help@gmu.edu">tk20help@gmu.edu</a> or <a href="mailto:https://cehd.gmu.edu/aero/tk20">https://cehd.gmu.edu/aero/tk20</a>. Questions or concerns regarding use of Blackboard should be directed to <a href="http://coursessupport.gmu.edu/">http://coursessupport.gmu.edu/</a>.
- For information on student support resources on campus, see <a href="https://ctfe.gmu.edu/teaching/student-support-resources-on-campus">https://ctfe.gmu.edu/teaching/student-support-resources-on-campus</a>

For additional information on the College of Education and Human Development, please visit our website  $\frac{https://cehd.gmu.edu/students/}{}$ .

# **Professional Development Project Description**

#### Course Performance Based Assessment

This is a Performance Based Assessment. The student will design, develop, refine, implement and reflect on a professional development experience (approximately 60 minutes) for teachers, administrators or other educational professionals. The final product should include the following: 1) topic identification and rationale; 2) an implementation plan; 3) all materials used or accessed; and 4) a written reflection paper about the professional development experience. The final report will be submitted on Blackboard in Tk20. For a complete rubric and grading criteria please see the rubric at the end of the syllabus.

#### **TOPIC IDENTIFICATION & RATIONALE**

Professional development should be centered on relevant and specific mathematics topics. In this project, a rationale is provided that specifically explains the connection of the professional development to the following: the school or district's needs, the promotion of mathematics instruction within the targeted audience, local, state and/or national goals for mathematics instruction. Things to consider are:

- A Clearly Defined Focus and Purpose: What is the topic you will base your professional development on?
- A Rationale for Why This Topic Matters: What is going on in your classroom which brings your attention to this topic? Why are you interested in this topic and why does it matter to you, other teachers/administrators, your district, and the field?

#### IMPLEMENTATION PLAN

The implementation plan should be clearly and comprehensively written so that another individual could pick up the plan with all materials and implement the professional development. This includes:

- Timing
- Materials
- Electronic downloads of materials (not weblinks)
- Anticipated responses of participants
- A focus on mathematics

- Anticipated teacher questions
- Anticipated responses to teacher questions,

The professional development implementation plan should emphasize collaboration and take into consideration the needs of both adult and student learners. An assessment should be included to determine the impact of the professional development and future needs of the stakeholders.

Additionally, the plan should focus on making a mathematics-focused shift through one of several actions: coaching /mentoring; building and navigating relationships with teachers, administrators, and the community; establishing and maintaining learning communities; analyzing and evaluating educational structures and policies that affect students' equitable access to high quality mathematics instruction; leading efforts to assure that all students have opportunities to learn important mathematics; evaluating the alignment of mathematics curriculum standards, textbooks, and required assessments and making recommendations for addressing learning and achievement gaps; developing appropriate classroom or school-level learning

environments; and collaborating with school-based professionals to develop evidence-based interventions for high- and low-achieving students.

## REFLECTION

The candidate will reflect on the role of learning and teaching of mathematics, the role of mathematics instructional leaders, the improvement of student learning and continuing the implementation.

The assessment identifies teachers' perceptions of newly acquired knowledge and professional practices in their mathematics teaching OR allows teachers to indicate their needs and support required for implementation. | exit ticket).  The assessment does not identify teachers' perceptions of newly acquired knowledge and professional practices in their mathematics teaching AND does not allow teachers to indicate their needs and support required for implementation. | (i.e. exit ticket).                             |

# SEQUENCE OF PLANNED FIELD EXPERIENCE

# NCTM Standard 7a

Engage in a sequence of planned field experiences and clinical practice under the supervision of an experienced and highly qualified mathematics educator that involves the development of a broad experiential base of knowledge and skills working with a range of student and adult learners in a variety of school and professional development settings and the development of interpersonal skills critical for mentoring other teachers and working with school-based personnel, district administrators, and others.

- The candidate uses the all steps in the following sequence to develop/ implement their professional development:
- 1. Develop a plan with peer collaboration. where feedback is provided
- 2. Modify the plan to include peer feedback.
- 3. Submit the plan to an experienced and highly qualified mathematics educator in advance of implementation.
- 4.Implement the plan in a school or district setting.5.Reflect deeply
- 5. Reflect deeply after implementation of the plan.

- The candidate uses at least four steps in the following sequence to develop/ implement their professional development:
- 1. Develop a plan with peer collaboration where feedback is provided
- 2. Modify the plan to include peer feedback
- 3. Submit the plan to an experienced and highly qualified mathematics educator in advance of implementation
- 4. Implement the plan in a school or district setting.
- 5.Reflect deeply after implementation of the plan.

- The candidate uses at least three steps in the following sequence to develop/ implement their professional development:
- Develop a plan with peer collaboration where feedback is provided
   Modify the plan
- 2. Modify the plan to include peer feedback
- 3. Submit the plan to an experienced and highly qualified mathematics educator in advance of implementation
- 4.Implement the plan in a school or district setting.5.Reflect deeply
- after implementation of the plan.

- Three or more of the following steps in the sequence are missing as the candidate develops/ implements the professional development plan:
- 1. Develop a plan with peer collaboration where feedback is provided
- 2. Modify the plan to include peer feedback
- 3. Submit the plan to an experienced and highly qualified mathematics educator in advance of implementation
- 4. Implement the plan in a school or district setting.
- 5.Reflect deeply after implementation of the plan.

# PROFESSIONAL DEVELOPMENT EXPERIENCE: REFLECTION

# THE ROLE OF LEARNING & TEACHING OF MATHEMATICS

# NCTM Standard 6a

Take an active role in their professional

The reflection clearly identifies how the professional development experience directly related to the learning

The reflection identifies how the professional development experience is directly related to the learning

The reflection identifies that the professional development experience is directly related to their learning

The reflection does not mention the candidate's personal teaching or learning of mathematics.

| growth by participating in professional development experiences that directly relate to the learning and teaching of mathematics.   | and teaching of mathematics.  The reflection clearly describes the impact of the professional development experience on the candidate's personal learning and teaching of mathematics. | and teaching of mathematics.  The reflection clearly describes the impact of the professional development experience on either the candidate's personal learning and or the candidate's personal teaching of mathematics. | and teaching of mathematics.  The explanation of the professional development experience is not connected to the candidate's personal teaching and learning of mathematics. |  |
|---|--|---|---|--|
| THE ROLE OF MATHEMATICS INSTRUCTIONAL LEADER NCTM Standard 6a  Take an active role in their professional growth by participating in professional development experiences that directly relate to their development as a mathematics instructional leader. | The reflection clearly identifies how the professional development experience directly related to the candidate's development as a mathematics instructional leader.                   | The reflection identifies how the professional development experience directly related to the candidate's development as a mathematics instructional leader.  | The reflection does not clearly identify how the professional development experience directly related to the candidate's development as a mathematics instructional leader. | The reflection does not mention the candidate's development as a mathematics instructional leader  |
| IMPROVE STUDENT UNDERSTANDIN G  NCTM Standard 7a  Engage in a sequence of planned field experiences and   | The reflection identifies two important understandings of elementary student mathematical development that were highlighted as a result of this  | The reflection identifies one important understanding of elementary student mathematical development that was highlighted as a result of this   | The reflection identifies one understanding of elementary student mathematical development.  The understanding was not  | The reflection does not identify any important understandings of elementary student mathematical development that were highlighted as a result of this |

# **Self-Study Research Project Description**

#### Course Performance Based Assessment

This is a Performance Based Assessment. The final research report will be submitted on Blackboard in Tk20. In addition to the final report, students will submit assignments throughout the semester that will support the development and implementation of their project including a research proposal and a draft literature review. Finally, students will present their findings in the last class session of the semester.

#### FIELD EXPERIENCE SEQUENCE

Throughout the semester the students will engage with both their peers and a highly qualified mathematics educator to gain individualized feedback on their projects. Students will use the following sequence to develop, implement and reflect deeply on the self-study project experience: develop planned field experience with peer collaboration where feedback is provided by a critical friend; modify planned field experience based upon peer feedback; frequently submit plan to an experienced and highly qualified mathematics educator for individualized feedback; and implement planned field experience in a school or district setting. Specific deadlines will be ongoing and provided by the highly qualified mathematics educator.

#### RESEARCH REPORT

You are required to write a final report that includes the following sections: Abstract, Rationale, Research Problem and Questions, Review of Related Literature, Method, Conceptual Framework, Context and Participants, Data Collection, Self-Study and Reflection, Findings, Implications on Teaching and Learning, Implications on Educational Field, and Critical Friend Collaboration Reflection. Your project should be useful to you and your students. A written report that includes the specific headings and subheading are listed in Chapter 12 of the textbook. Exemplars are provided on Blackboard.

The paper should be formatted in APA style with references cited appropriately. For a complete rubric and grading criteria please see the rubric at the end of the syllabus.

#### **CLASS PRESENTATION**

You are required to present your research project to your peers on the last class. Your presentation must include a one-page handout that includes: your research question, rationale/purpose/data collection/resources and tools, findings, implications for math specialists and your practice. You may use bullets, write sentences, incorporate images or charts, and add additional information as needed.

#### SELF-STUDY PROJECT FINAL REPORT

Write a final report that is useful to you and your context. Include the following sections:

- Rationale Introduction
- Research Question
- Review of Related Literature
- Method
- Context
- Participants
- Data Collection
- Analysis
- Findings
- Limitations
- Discussion
- Implications & Reflection

#### Role of Critical Friend

Additionally, the project should focus on making a mathematics-focused shift through one of several actions: coaching /mentoring; building and navigating relationships with teachers, administrators, and the community; establishing and maintaining learning communities; analyzing and evaluating educational structures and policies that affect students' equitable access to high quality mathematics instruction; leading efforts to assure that all students have opportunities to learn important mathematics; evaluating the alignment of mathematics curriculum standards, textbooks, and required assessments and making recommendations for addressing learning and achievement gaps; developing appropriate classroom or school-level learning environments; and collaborating with school-based professionals to develop evidence-based interventions for high- and low-achieving students.

Include specific headings and subheadings in your report listed in Chapter 12 of the textbook. The final report should be well organized, and follow APA formatting. Submit the final report on Blackboard in Tk20.

# FINDINGS: PRESENTATION

#### **NCTM Element 7a**

Demonstrate a broad experiential base of knowledge and skills working with a range of student and adult learners in varied school and professional development settings.

The findings include all of the following:

- The findings are clearly and thoroughly and presented.
- Themes from the findings are connected and coherently presented.
- Convincing evidence is provided that supports identified themes.

The research questions and the findings are connected.

The findings include three of the following:

- The findings are adequately presented.
- Themes from the findings are connected and coherently presented.
- Convincing evidence is provided that supports identified themes.

The research questions and the findings are connected.

The findings include two of the following:

- The findings are adequately presented.
- Themes from the findings are connected and coherently presented.

 Convincing evidence is provided that supports identified themes.

The research questions and the findings are connected.

The finding include fewer than two of the following:

- The findings are adequately presented.
- Themes from the findings are connected and coherently presented.

 Convincing evidence is provided that supports identified themes.

The research questions and the findings are not connected.

#### **SELF-STUDY PROJECT: IMPLICATIONS & REFLECTION**

#### IMPLICATIONS: TEACHING & LEARNING

#### **NCTM Element 7a**

Gain an in-depth understanding of the mathematical development of students across all of the elementary grades. Both of the following implications for the teaching and learning of students are included:

- The reflection identifies the important understandings of student mathematical development and learning that were highlighted as a result of this experience.
- The reflection explains the possible implications of student

One of the following implications for the teaching and learning of students are included:

● The reflection identifies the important understandings of student mathematical development and learning that were highlighted as a result of this experience.

The reflection explains the possible implications of student

Neither of the following implications for the teaching and learning of students are included:

- The reflection identifies the important understandings of student mathematical development and learning that were highlighted as a result of this experience.
- The reflection explains the possible implications of student

No implications for the teaching and learning of students are included.

| IMPLICATIONS: EDUCATIONAL FIELD, STATE & LOCAL  NCTM Element 7b  Develop and use leadership skills to improve mathematics programs at the school and/or district level. | understanding and learning for teaching.  The reflection includes all the following:  An explanation of the implications of the research and results for the educational field  An explanation of the implications of the research and results on the national and state education standards  A discussion of limitations and future research possibilities | understanding and learning for teaching.  The reflection includes two of the following:  An adequate explanation of the implications of the research and results for the educational field  An adequate explanation of the implications of the research and results on the implications of the research and results on the national and state education standards  A discussion of limitations and | understanding and learning for teaching.  The reflection includes one of the following:  An adequate explanation of the implications of the research and results for the educational field  An adequate explanation of the implications of the research and results for the educational field  An adequate explanation of the implications of the research and results on the national and state education standards  A discussion of limitations and | No implications for the educational field are included.  |
