Email Address: [REDACTED]@gmu.edu

Prerequisites/Corequisites

None

University Catalog Course Description

SEED 540 explores the processes that influence the intellectual, social, emotional and physical development of middle and high school students. Within that context, the course further examines the processes and theories that provide a basis for understanding the learning process. Particular attention is given to constructivist theories and practices of learning, the role of symbolic competence as a mediator of learning, understanding, and knowing, and the facilitation of critical thinking and problem solving. Processes of developing and learning are considered as they impact the design of instruction and the selection of curriculum. The course also explores the relation of theories of learning to the construction of learning environments, student motivation, classroom management, assessment and how technology supports teaching and learning.

Course Overview

Not Applicable

Course Delivery Method

This course will be delivered online (76% or more) using [select either a synchronous or an asynchronous] format via Blackboard Learning Management system (LMS) housed in the MyMason portal. You will log in to the Blackboard (Bb) course site using your Mason email name (everything before @masonlive.gmu.edu) and email password. The course site will be available on [Day and/or Time].

Under no circumstances, may candidates/students participate in online class sessions (either by phone or Internet) while operating motor vehicles. Further, as expected in a face-to-face class meeting, such online participation requires undivided attention to course content and communication.

Technical Requirements

To participate in this course, students will need to satisfy the following technical requirements:

- High-speed Internet access with standard up-to-date browsers. To get a list of Blackboard's supported browsers see:
https://help.blackboard.com/Learn/Student/Getting_Started/Browser_Support#supported-browsers

To get a list of supported operation systems on different devices see:

https://help.blackboard.com/Learn/Student/Getting_Started/Browser_Support#tested-devices-and-operating-systems

- Students must maintain consistent and reliable access to their GMU email and Blackboard, as these are the official methods of communication for this course.
- Students will need a headset microphone for use with the Blackboard Collaborate web conferencing tool. [Delete this sentence if not applicable.]
- Students may be asked to create logins and passwords on supplemental websites and/or to download trial software to their computer or tablet as part of course requirements.
- The following software plug-ins for PCs and Macs, respectively, are available for free download: [Add or delete options, as desire.]
 - Adobe Acrobat Reader: <https://get.adobe.com/reader/>
 - Windows Media Player:
<https://support.microsoft.com/en-us/help/14209/get-windows-media-player>

- Apple Quick Time Player: www.apple.com/quicktime/download/

Expectations

- Course Week: Our course week will begin on Mondays and will finish on Sunday. A synchronous (Zoom) class will take place during a scheduled time to introduce the week's lessons.
- Log-in Frequency:
Students must actively check the course Blackboard site and their GMU email for communications from the instructor, class discussions, and/or access to course materials at least three times per week, with one time being on Sunday to access the weekly quiz. In addition, students must log-in for all scheduled online synchronous meetings.
- Participation:
Students are expected to actively engage in all course activities throughout the semester, which includes viewing all course materials, completing course activities and assignments, and participating in course discussions and group interactions.
- Technical Competence:
Students are expected to demonstrate competence in the use of all course technology. Students who are struggling with technical components of the course are expected to seek assistance from the instructor and/or College or University technical services.
- Technical Issues:
Students should anticipate some technical difficulties during the semester and should, therefore, budget their time accordingly. Late work will not be accepted based on individual technical issues.
- Workload:
Please be aware that this course is **not** self-paced. Students are expected to meet *specific deadlines* and *due dates* listed in the **Class Schedule** section of this syllabus. It is the student's responsibility to keep track of the weekly course schedule of topics, readings, activities and assignments due.
- Instructor Support:
Students may schedule a one-on-one meeting to discuss course requirements, content or other course-related issues. Those unable to come to a Mason campus can meet with the instructor via telephone or web conference. Students should email the instructor to schedule a one-on-one session, including their preferred meeting method and suggested dates/times.
- Netiquette:
The course environment is a collaborative space. Experience shows that even an innocent remark typed in the online environment can be misconstrued. Students must always re-read their responses carefully before posting them, so as others do not consider them as personal offenses. *Be positive in your approach with others and diplomatic in selecting your words.* Remember that you are not competing with classmates, but sharing information and learning from others. All faculty are similarly expected to be respectful in all communications.
- Accommodations:
Online learners who require effective accommodations to insure accessibility must be registered with George Mason University Disability Services.

Learner Outcomes or Objectives

Course Objectives	Conceptual Framework SEED SEEDS
Students will demonstrate an understanding of how theoretical approaches to learning and development relate to classroom management, instruction, and assessment through active participation in Blackboard discussions, formative assessments and tasks.	Advocacy & Agency Inquiry & Reflection Partnership & Collaboration
Students will identify theoretical/research frameworks associated with student motivation by writing a paper on adolescents and motivation.	Inquiry & Reflection Partnership & Collaboration
Students will develop and reinforce their critical thinking, problem solving, oral, and writing skills by participating in a collaborative group that researches and presents various aspects of psychological theory and research using PowerPoint slides.	Inquiry & Reflection Social Justice Partnership & Collaboration
Students will demonstrate an understanding of the role in the learning process of constructing knowledge, prior knowledge, problem solving, and social/environmental scaffolding through successfully completing an analysis of a case study.	Advocacy & Agency Social Justice Inquiry & Reflection
Students will complete a reflection on equitable instructional practices and student supports.	Social Justice, Inquiry & Reflection & Respect & Relationships
Students will demonstrate an understanding of stages and processes relating to adolescents' social, emotional, moral, cognitive, and physical development and learning theories by applying a student in a case study.	Inquiry & Reflection Respect & Relationships

Course Performance Evaluation

Students are expected to submit all assignments on time in the manner outlined by the instructor (e.g., Blackboard).

Course Requirements and Assignments

1. Online Participation

Your participation during virtual, in-person and online (e.g. Blackboard) is critical to you and your classmates' success in understanding and learning the material

Blackboard discussion is an outstanding method for conducting asynchronous discussion focused on specific topics. Since this class is online, it is important to learn about each other and feel comfortable exchanging ideas virtually, whether they are shared by all or not. In fact, debate is encouraged as long as a respectful tone is maintained. Please review the rubric for specific expectations.

- Students are required to post to the appropriate discussion by the date specified on the schedule. Participation should occur throughout the week and not all at the same time. To create a respectful and academic online community, responses should include best thoughts about the readings, assignments, and other students' postings, and the instructor's comments. The discussion board is a safe place to make mistakes and ask questions.
 - Elaborate and/or extend someone else's postings.
 - When possible response should be multimodal (more than one mode/type of information). For example, in addition to writing a response, you should insert hyperlinks, graphics, videos, and/or audio to illustrate the points.
- **Tone:** Post comments using a positive or at least a neutral tone. The most basic rule of Netiquette in the Discussion Forums is to post only comments that you would be comfortable receiving.
- **Content:** Review the content of your posting before posting it. Does it add value to the discussion? Posting irrelevant material impedes the progress of mastering content in the discussion. Does it fulfill the rubric expectations.

To review the rubric for how you will be evaluated, please see Appendix A.

2. Case Study & Student Application Project

Students will read or watch and complete case study assignments throughout the semester. These assignments will deal with adolescent levels of development (e.g.—physical, social, or moral), adolescent motivation, and classroom strategies. The case analysis, in general, serves as a means for

you to demonstrate your understanding of the intersection of learning theory with pedagogical issues. Cases also allow you to examine multiple perspectives on problems students experience in their schooling.

You should use these discussions as practice for this assignment, as the case study & student application project is a summative assessment of your ability to use psychological theory to analyze problems in a classroom. Case studies give you a chance to practice approaches a thoughtful, ethically principled teacher would use to solve problems. In these case analyses, for example, we always hold the teacher responsible for students' success. If students are not doing well, it is the teacher's task to figure out the mismatch between the teaching and learning that may be preventing the student(s) from being successful. This way of thinking will become second nature, so that when faced with problems in your own class, you will think: "What might I do differently to help this student be successful?"

For the graded case study and student application project, please read the rubric carefully before writing your analysis. It is expected that this paper will be a minimum of six (double spaced) pages. First, please provide a brief overview of the situation. Then give four examples of problems that occurred in the case study and explain why the event is a problem. Then, correctly apply at least eight developmental stages, learning theories, or classroom strategies—with definitions—from your text or other readings. Applying the stages, theories or strategies from educational psychology means to use the theory learned in class to change the teacher's practice in the case study to create a more positive environment. If you do the math for this assignment, it is encouraged that you suggest 2 strategies for each problem that you identify.

The last component of this assignment is to select a student in the case study and describe how you would support that student. Please describe strategies for determining motivation, creating a supportive learning environment and strategies for meeting the diverse needs of adolescents. The rubric is provided in Appendix B.

3. Motivation Paper

For this assignment, I would like you to interview an adolescent about how motivation affects her or his learning and behavior. That is, what motivates this student to succeed? If needed, you may also interview a teacher about what motivational techniques work best in the classroom. Be sure to read Chapters 10 & 11, which have some theoretical underpinnings about motivation, before you do your interview. More than one individual may be interviewed if you want to tie the stories together in a unique way.

You should begin your paper with a general definition of motivation. Do your interviewee's experiences correspond with the formal definition? Also, take into consideration that there are two types of motivation: intrinsic and extrinsic. Finally, there are four (or more) different perspectives that can be considered when analyzing the nature of motivation: behavioral, humanistic, social cognitive, and cognitive. I will briefly describe each one of these perspectives:

- **Behavioral Perspective**=Rewards are consequences of behaviors. To the extent that learners find a reinforcement satisfying or desirable, they will engage in the behavior that leads to that response.
- **Humanistic Perspective**=Reaction against behaviorism. Thus, humanists believe that needs propel learners to see certain goals.

- Social Cognitive Perspective=Behavioral + cognitive aspects. Thus, learners must expect to achieve a goal, and they must value such an achievement.
- Cognitive Perspective=Focus on thinking. Thus, learners hold beliefs about their abilities to achieve a goal, and they must value such an achievement.

Finally, be sure to look at attribution theory and relate it to your interviewer's responses.

This paper should be five to ten pages long (double-spaced). **Please** apply a minimum of ten psychological concepts **in your writing**. Since it is an interview, feel free to use quotations from your participant(s), but keep the identity of the participants anonymous by using a pseudonym (**25 Points**). The rubric is provided in Appendix C.

4. Theory to Practice Presentation

You will begin by forming groups of two to four based on a shared interest in a psychological theory or related topic to this course. To start the research process, each group should read the relevant chapter(s) in the textbook and locate a minimum of five articles with **at least two being scholarly research articles**. The scholarly articles are published in scientific journals--e.g., *The Journal of Educational Psychology*, *Contemporary Journal of Educational Psychology*, *Educational Psychologist*, *Educational Researcher*, and *Instructional Science*. Each person in the group should identify and report on at least five articles. The group should create two or three questions and also engage in the follow-up discussion.

All group members are required to participate in this presentation. Be creative but keep in mind that it is a formal presentation. A rubric will be used to grade the presentation.

The textbook, research articles, case studies, the internet, and other sources may be used; however, do not just give a summary of information that we already know. The purpose of the presentation is to delve deeper into a topic and make it relevant to classroom teachers. Search for the latest research on a particular topic and effectively defend your conclusions. The rubric is provided in Appendix D.

5. Equity Reflection

The reflection will be a synthesis of class readings and discussions, personal connections and future goals to work on to support equity in your current or future classroom.

1. Evidence of Course Reading and Class Activities – Briefly synthesize the enduring understandings that you have gained.

2. Personal Application (Metacognition) – Analyze how the course readings and class activities can be applied to help you to understand yourself as a professional learner, others and course concepts.

3. Generalized Student Application – Explain how you will apply what you have learned to a classroom setting or when working with adolescents.

Written Assignments: All written assignments must be typed. Assignments are to be turned in to Blackboard at the beginning of class on the date due. In addition, all work submitted in this

course must be your own or attributed to the proper author using the appropriate research reference format (APA Manual 7th ed.). Refer to the GMU Honor Code for further information.

Note: More detailed descriptions of assignments and rubrics are included at the end of the syllabus.

Summary of Point Distribution:

Online Participation with Weekly Quiz	15 points
Case Study and Student Application Project	25 points
Motivation paper	25 points
Theory to Practice Presentations	20 points
Equity Reflection	15 points
Total	100 points

Grading

Grade	Grading	Grade Point
A	95-100%	4.00
A-	90-94%	3.67
B+	87-89%	3.33
B	83-86%	3.00
B-	80-82%	2.67
C	70-79%	2.00
F	Below 70%	0.00

Note: “C” is not satisfactory for a licensure course; “F” does not meet requirements of the Graduate School of Education

Note: Maintain copies of all projects to document progress through the Secondary Education Program. Projects may become part of your professional portfolio, and useful when you have your own classroom.

Note: Faculty reserves the right to alter the schedule as necessary, with notification to students.

Campus Resources

- **VIA Performance-Based Assessment Submission Requirement:** Every student registered for any Secondary Education course with a required VIA performance-based assessment(s) (designated as such in the syllabus) is required to submit this/these assessment(s) to VIA through “Assessments” in Blackboard (regardless of whether a course is an elective, a one-time course or part of an undergraduate minor). For SEED 492/493/494/496/792/793/794/795/796, these assessments include the following items:
 - InTASC Evaluation Rubric (final)
 - Intern Self-Assessment of DispositionsAn Intern’s grade cannot be posted unless all of the items have been completed/submitted.
- For information on student support resources on campus, see <https://ctfe.gmu.edu/teaching/student-support-resources-on-campus>

Notice of mandatory reporting of sexual assault, interpersonal violence, and stalking:

As a faculty member, I am designated as a “Responsible Employee,” and must report all disclosures of sexual assault, interpersonal violence, and stalking to Mason’s Title IX Coordinator per University Policy 1202. If you wish to speak with someone confidentially, please contact one of Mason’s confidential resources, such as Student Support and Advocacy Center (SSAC) at 703-380-1434 or Counseling and Psychological Services (CAPS) at 703-993-2380. You may also seek assistance from Mason’s Title IX Coordinator by calling 703-993-8730, or emailing titleix@gmu.edu.

For additional information on the College of Education and Human Development, please visit our website <https://cehd.gmu.edu/students/> .

[Additional Program or Division content, supplemental materials, instructions, and graphics may be placed here, as appropriate.]
