Early Childhood Education**

ECED 501.600/601 Developmental Pathways of Diverse Learners, Birth-Adolescence
3 Credits, Summer 2024
5/13/2024-8/3/2024, Online Synchronous
Wednesdays/ 5:00-7:40 pm (5/22, 6/19, 7/24)

Faculty

Name: Chelseann Christopher, PhD
Office Hours: By Appointment
Office Location: Innovation Hall 336, Fairfax Campus
Office Phone: 703-993-3844
Email Address: cchris12@gmu.edu

Prerequisites/Corequisites

None

University Catalog Course Description

Examines child and adolescent development from diverse perspectives. Addresses typical and atypical physical, social and emotional, language, and intellectual development. Explores role of individual differences and culture in understanding and interpreting child and adolescent development.

Course Delivery Method

This course will be delivered online (76% or more) using a synchronous format via Blackboard Learning Management system (LMS) housed in the MyMason portal. You will log in to the Blackboard (Bb) course site using your Mason email name (everything before @masonlive.gmu.edu) and email password. The course site will be available on May 13, 2024.

Under no circumstances, may candidates/students participate in online class sessions (either by phone or Internet) while operating motor vehicles. Further, as expected in a face-to-face class meeting, such online participation requires undivided attention to course content and communication.

Technical Requirements

To participate in this course, students will need to satisfy the following technical requirements:

- High-speed Internet access with standard up-to-date browsers. To get a list of Blackboard's supported browsers see: https://help.blackboard.com/Learn/Student/Getting_Started/Browser_Support#supported-browsers
To get a list of supported operation systems on different devices see: https://help.blackboard.com/Learn/Student/Getting_Started/Browser_Support#tested-devices-and-operating-systems

- Students must maintain consistent and reliable access to their GMU email and Blackboard, as these are the official methods of communication for this course.
- Students will need a headset microphone for use with the Blackboard Collaborate web conferencing tool. [Delete this sentence if not applicable.]
- Students may be asked to create logins and passwords on supplemental websites and/or to download trial software to their computer or tablet as part of course requirements.
- The following software plug-ins for PCs and Macs, respectively, are available for free download: [Add or delete options, as desire.]
 - Adobe Acrobat Reader: <https://get.adobe.com/reader/>
 - Windows Media Player: <https://support.microsoft.com/en-us/help/14209/get-windows-media-player>
 - Apple Quick Time Player: www.apple.com/quicktime/download/

Expectations

- Course Week: Our week will start on Monday and finish on Sunday.
- Log-in Frequency: Students must actively check the course Blackboard site and their GMU email for communications from the instructor, class discussions, and/or access to course materials at least two times per week.
- Participation: Students are expected to actively engage in all course activities throughout the semester, which includes viewing all course materials, completing course activities and assignments, and participating in course discussions and group interactions.
- Technical Competence: Students are expected to demonstrate competence in the use of all course technology. Students who are struggling with technical components of the course are expected to seek assistance from the instructor and/or College or University technical services.
- Technical Issues: Students should anticipate some technical difficulties during the semester and should, therefore, budget their time accordingly. Late work will not be accepted based on individual technical issues.
- Workload: Please be aware that this course is **not** self-paced. Students are expected to meet *specific deadlines* and *due dates* listed in the **Class Schedule** section of this syllabus. It is the student's responsibility to keep track of the weekly course schedule of topics, readings, activities and assignments due.
- Instructor Support: Students may schedule a one-on-one meeting to discuss course requirements, content or other course-related issues. Those unable to come to a Mason campus can meet with the instructor via telephone or web conference. Students should email the instructor to schedule a one-on-one session, including their preferred meeting method and suggested dates/times.
- Netiquette: The course environment is a collaborative space. Experience shows that even an innocent remark typed in the online environment can be misconstrued. Students must always re-read their responses carefully before posting them, so as others do not consider them as personal offenses. *Be positive in your approach with others and diplomatic in selecting your words.* Remember that you are not competing with classmates, but sharing information and learning from others. All faculty are similarly expected to be respectful in all communications.
- Accommodations: Online learners who require effective accommodations to ensure accessibility must be registered with George Mason University Disability Services.

Learner Outcomes or Objectives

This course is designed to enable students to do the following:

1. Describe the physical, social, emotional, speech and language, and intellectual development of diverse learners from birth through adolescence and explain how to use these understandings to guide learning experiences and relate meaningfully to students.
2. Describe the major theories of development and critically examine the theories as they apply to the lives of culturally, linguistically, ability, and socioeconomically diverse children and their families, including children with economic, social, racial, ethnic, religious, physical, and intellectual differences.
3. Examine the transactional nature of overall development in the context of the family, community, socioeconomic status, and culture.
4. Identify environmental and biological/physical/medical at-risk factors that can contribute to possible developmental disabilities, developmental issues, and atypical development across the physical, social, emotional, speech and language, and intellectual domains.
5. Discuss the etiology of and use multiple criteria to identify developmental disorders, including attention deficit disorders, developmental disorders, and giftedness.
6. Identify typical developmental milestones of diverse children from birth through adolescence and their cultural and socioeconomic variations.
7. Observe and describe overall development in the physical, intellectual, speech and language, social, and emotional domains as it occurs in natural environments and through play.
8. Explain how research is currently documenting children's development across time.
9. Exhibit standards of professionalism, ethical standards, and personal integrity in interactions with classmates, the instructor, and others.
10. Use writing as an instructional and assessment tool to generate, gather, plan, organize, and to communicate for a variety of purposes; integrate correct written conventions (i.e., grammar, usage, mechanics, and spelling); and format using current APA style.

See Class Schedule for selected Position Statements from the Division of Early Childhood Education (DEC) of the Council for Exceptional Children (CEC), the National Association for the Education of Young Children (NAEYC), and the National Association for Gifted Children (NACG).

This course also requires reading published journal articles on human development. Example journals include the following: *Early Education and Development*, *Child Development*, and *Human Development*. These and other journals are available on the Mason library website.

Course Performance Evaluation

Students are expected to submit all assignments on time in the manner outlined by the instructor (e.g., Blackboard, VIA, hard copy).

Considering Developmental Theories Paper (9 points)

In order that all class members leave this course with an overview of the most prominent developmental theories in the field of early childhood education and gain a critical perspective on the values and liabilities of different theories and their application, students will prepare a review of a developmental theory and associated theorists. Grand theories covered in the text include psychodynamic theories, behaviorist theories, Piaget's constructive theory, and Vygotsky's sociocultural theory. Modern theories covered include evolutionary theories, social

learning theories, information-processing theories, and systems theories. Students will compose a two- to three-page summary that captures key tenants of the developmental theory and how it relates to children’s developmental progression.

Students will select or be assigned one perspective and provide a summary of the following:

- important theorists associated with the paradigm
- key tenets of the theory
- how theory explains cultural differences that are apparent in development
- how theory explains variation in development, including disabilities
- weaknesses and strengths of theory
- the impact of the theory on education

Students may select or be assigned one of the following theories:

- Erikson: Psychosocial
- Vygotsky: Sociocultural
- Piaget: Constructivist
- Behaviorism: Operant conditioning
- Behaviorism: Classical conditioning
- Bronfenbrenner: Ecological systems

Students will demonstrate accurate knowledge of APA formatting within the paper and begin to engage with professional journals for early childhood educators, as well as the textbook or other course materials. Accordingly, students will find one article from *Young Children* and one article from *Young Exceptional Children* that provides complementary information related to the specific developmental theory. Information from each article will be briefly included in the summary and show evidence of appropriate APA citations for different writing practices including summarizing with in-text citations and using direct quotes with in-text citations.

Article Annotations (15 points, 5 points each)

Students will explain how research is currently documenting children’s development across time. Students will read and annotate three articles. The articles reviewed and prepared for presentation will be provided to students by the course instructor. Annotations will include a brief discussion of the primary research question(s), participants, methods, findings, and conclusions. Students will use the annotation template to document essential elements of the research article and present their annotation to a small discussion group.

Infant/Toddler (Birth-30 months)	Preschool/Pre-kindergarten (30-60 months)	Early Elementary (K-3)
Physical: Dillman et al. (2019) Physical: Forma et al. (2019) Intellectual: Shuwairi et al. (2019) Social-Emotional: Petrenko et al. (2019)	Physical: Moser et al. (2018) Intellectual: Liu et al. (2019) Intellectual: Burns-Nader et al. (2019) Social-emotional: St. John et al. (2019) Social-emotional: Li et al. (2018)	Physical: Nelson et al. (2017) Intellectual: Bianco et al. (2019). Intellectual: Brink et al. (2019) Social-emotional: McCoy et al. (2018)

Linguistic: Ramirez-Esparza et al. (2017)	Linguistic: Leach et al. (2019)	Linguistic: Gámez et al. (2019)
---	---------------------------------	---------------------------------

Developmental Milestones (21 points, 7 points each)

Students will prepare a milestone reference document for infant/toddler (6 months), preschool/early childhood (3 years), and early elementary/middle childhood (8 years). Students will identify the major milestones for each of the following domains: physical, social and emotional, speech and language acquisition, and intellectual/cognitive development. Students will identify typical developmental progressions. Students will use the text and/or other course materials for this project. All information presented needs to come from these resources. Students should see Blackboard for detailed instructions.

Students will also highlight a specific developmental theory for each of the milestone charts prepared as outlined below.

- Constructivism: Piaget (infant/toddler)
- Sociocultural: Vygotsky (preschool/prekindergarten)
- Psychosocial: Erikson (primary)
- Behaviorism: Classical conditioning (any of the 3 age levels)
- Behaviorism: Operant conditioning (any of the 3 age levels)

Multiple Influences on Young Children’s Development Paper (15 points)

To demonstrate an understanding of the ways that child development and the learning process occur in multiple contexts, including family, culture, language, community, and early learning setting, as well as in a larger societal context that includes structural inequalities. Students will develop a five- to seven-page paper that describes how the following factors may impact child development and learning:

- family/family structure,
- socioeconomic status,
- language and culture,
- school,
- community, and
- social inequities.

Students will include a connection to Bronfenbrenner’s Ecological Systems Theory to support their analysis. Students will use in-text citations from the textbook, class lectures, and at least three professional/peer-reviewed articles, book chapters, reports, etc. (but none of the “Resource Articles”) to support their discussions. Students will include a reference list in APA style.

Case Study Analysis (15 points)

To demonstrate an understanding of the developmental period of early childhood from birth through age 8 across physical, cognitive, social and emotional, and linguistic domains, including bilingual/multilingual development, students will develop an analysis with seven to nine pages of text (plus the title and reference pages) on a video case study randomly assigned from one of three age groups: Infant/Toddler, Preschool, or Early Elementary. They will view the video and then write a paper that discusses the children’s unique characteristics and needs, and describes at least one developmental theory that supports their analysis of the video vignette.

Part A: Students will describe the child’s current state of development, focusing on the child’s unique characteristics and needs in relation to relevant developmental milestones. They will cite specific examples observed in the video case and support their assertions with current research from the course textbook and/or other course materials, which may be supplemented by information from external scholarly sources. They will discuss each of the following areas:

- Physical development,
- Intellectual development,
- Social and emotional development, and
- Speech and language development.

Part B: For the case study analysis, students will also identify and discuss one major developmental theory that supports their analysis of the video vignette. These include psychodynamic theory (Freud), psychodynamic theory (Erikson), behaviorist theory (classical conditioning), behaviorist theory (operant conditioning), Piaget’s constructive theory, Vygotsky’s sociocultural theory, evolutionary theory, social learning theory, information-processing theory, and ecological systems theory. Students will explain how the developmental theory informs educators’ understanding of the child’s development.

Students will use the course textbook and/or other course materials, which may be supplemented by information from external scholarly (peer-reviewed) sources. Students will use in-text citations and include a reference list formatted in APA style.

- **Other Requirements**

Attendance and Participation (25 points)

1. Attendance is taken when the class is scheduled to start, and a student will be considered late once attendance is taken. If a student leaves more than 10 minutes before the end of the class, then it is considered an early departure. Two late arrivals or early departures, or a combination of both, equals one absence.
2. Students who are registered for the course at the start of the semester must attend the first class session to continue in the course. If the student is registered for the course and unable to attend the first class session, they should drop the course and plan to take it in a subsequent semester.
3. Course length:
 - a. For undergraduate students: In 15-week semester-long courses, more than 2 class absences will result in one full letter grade (10%) deduction. For example, if a student has a 92% in a 15-week course, after more than 2 absences their grade will automatically change to an 82%. In a course that is less than a full 15-week semester length, inclusive of 7.5-week and 10-week courses, more than 1 class absence will result in one full letter grade (10%) deduction. For example, if a student has a 92% in a 7.5-week course or a 10-week course, after more than 1 absence their grade will automatically change to an 82%.
 - b. For graduate students: In 15-week semester-long courses, more than 2 class absences will result in one letter grade (5%) deduction. For example, if a student has 92% in a 15-week course, after more than 2 absences their grade will

automatically change to an 87%. In a course that is less than a full 15-week semester length, inclusive of 7.5-week and 10-week courses, more than 1 class absence will result in one letter grade deduction. For example, if a student has a 92% in a 7.5-week course or a 10-week course, after more than 1 absence their grade will automatically change to an 82%.

4. Per the catalog ([AP.1.6.1](#)), excused absences, to observe religious holidays or to participate in university-sponsored activities (e.g., intercollegiate athletics, forensics team, dance company, etc.) must be communicated to each faculty, within the first two weeks of the semester, with the dates of major religious holidays on which the student will be absent, and the dates for which they are requesting an excused absence for participation in any university-sponsored activity scheduled prior to the start of the semester, and as soon as possible otherwise. Absence from classes or exams for these reasons does not relieve students from responsibility for any part of the course work required during the absence. Students who miss classes, exams, or other assignments because of their religious observance or for participation in a university activity will be provided a reasonable alternative opportunity, consistent with class attendance policies stated in the syllabus, to make up the missed work. Students are obligated to provide their instructor with a letter from a university official stating the dates and times that participation in the University-sponsored activity would result in the student missing class.
5. Inclusive ECE program participation policy:
 - a. In accordance with the GMU Attendance Policies (University Catalog, 2023-2024), “Students are expected to attend the class periods of the courses for which they are registered. In-class participation is important not only to the individual student, but also to the class as a whole. Because class participation is a factor in grading, instructors may use absence, tardiness, early departure, or failure to engage in online classes as de facto evidence of nonparticipation.” See <https://catalog.gmu.edu/policies/academic/registration-attendance/#ap-1-6>.

Online participation in synchronous sessions requires students to remain engaged and active learners. Therefore, students must keep their camera on throughout the entire class session. Students must attend the entire class session without distractions and participate in small group and whole group activities. If cameras are off and engagement is not evidenced the student will be marked as absent.

If you must be absent, late, or leave early from class, or have your camera off, inform the instructor prior to the beginning of the class session, at least 24-48 hours.

Written Assignments

All formal written assignments will be evaluated for content and presentation. The American Psychological Association, Seventh Edition (APA) style will be followed for all written work. All written work unless otherwise noted must be completed on a word processor and should be proofread carefully. (Use spell check!) If students are not confident of their own ability to catch errors, they should have another person proofread their work. When in doubt, they should check the APA manual. Students may consult the Writing Center for additional writing support. Students will do the following:

1. Present ideas in a clear, concise, and organized manner. (Avoid wordiness and redundancy.)
2. Develop points coherently, definitively, and thoroughly.
3. Refer to appropriate authorities, studies, and examples to document where appropriate. (Avoid meaningless generalizations, unwarranted assumptions, and unsupported opinions.)
4. Use correct capitalization, punctuation, spelling, and grammar.
5. Type the paper with double spacing, indented paragraphs, 1-inch margins all around, and 12-point Times New Roman font.

• **Grading**

A = 95-100 A- = 90-94 B+ = 87-89 B = 80-86 C = 70-79 F = <70

Incomplete (IN): At the student’s request, this grade may be given to a student who is passing a course but who may be unable to complete scheduled coursework for a cause beyond reasonable control.

All CEHD students are held to the university grading policies as described in the Academic Policies section of the current catalog, which can be accessed at <http://catalog.gmu.edu>. Those students seeking Virginia initial teaching licensure must earn a B- or better in all graduate licensure coursework.

Professional Dispositions

Students are expected to exhibit professional behaviors and dispositions at all times. See <https://cehd.gmu.edu/students/policies-procedures/>.

Core Values Commitment

The College of Education and Human Development is committed to collaboration, ethical leadership, innovation, research-based practice, and social justice. Students are expected to adhere to these principles: <http://cehd.gmu.edu/values/>.

GMU Policies and Resources for Students

Policies

- Students must adhere to the guidelines of the Mason Honor Code (see <https://catalog.gmu.edu/policies/honor-code-system/>).
- Students must follow the university policy for Responsible Use of Computing (see <https://universitypolicy.gmu.edu/policies/responsible-use-of-computing/>).
- Students are responsible for the content of university communications sent to their Mason email account and are required to activate their account and check it regularly. All communication from the university, college, school, and program will be sent to students **solely** through their Mason email account.
- Students with disabilities who seek accommodations in a course must be registered with George Mason University Disability Services. Approved accommodations will begin at the time the written letter from Disability Services is received by the instructor (see <http://ds.gmu.edu/>).
- Students must follow the university policy stating that all sound emitting devices shall be silenced during class unless otherwise authorized by the instructor.

Campus Resources

- Support for submission of assignments to VIA should be directed to viahelp@gmu.edu or <https://cehd.gmu.edu/aero/assessments>. Questions or concerns regarding use of Blackboard should be directed to <https://its.gmu.edu/knowledge-base/blackboard-instructional-technology-support-for-students/>.
- For information on student support resources on campus, see <https://ctfe.gmu.edu/teaching/student-support-resources-on-campus>.

Notice of mandatory reporting of sexual assault, sexual harassment, interpersonal violence, and stalking: As a faculty member, I am designated as a “Non-Confidential Employee,” and must report all disclosures of sexual assault, sexual harassment, interpersonal violence, and stalking to Mason’s Title IX Coordinator per [University Policy 1202](#). If you wish to speak with someone confidentially, please contact one of Mason’s confidential resources, such as [Student Support and Advocacy Center \(SSAC\)](#) at 703-380-1434 or [Counseling and Psychological Services \(CAPS\)](#) at 703-993-2380. You may also seek assistance or support measures from Mason’s Title IX Coordinator by calling 703-993-8730, or emailing titleix@gmu.edu.
